

CAVIDADE NASAL

NARIZ EXTERNO

Forma de pirâmide triangular
de base inferior

Face lateral

Dorso

retilíneo

aquilino

arrebicado

Ápice

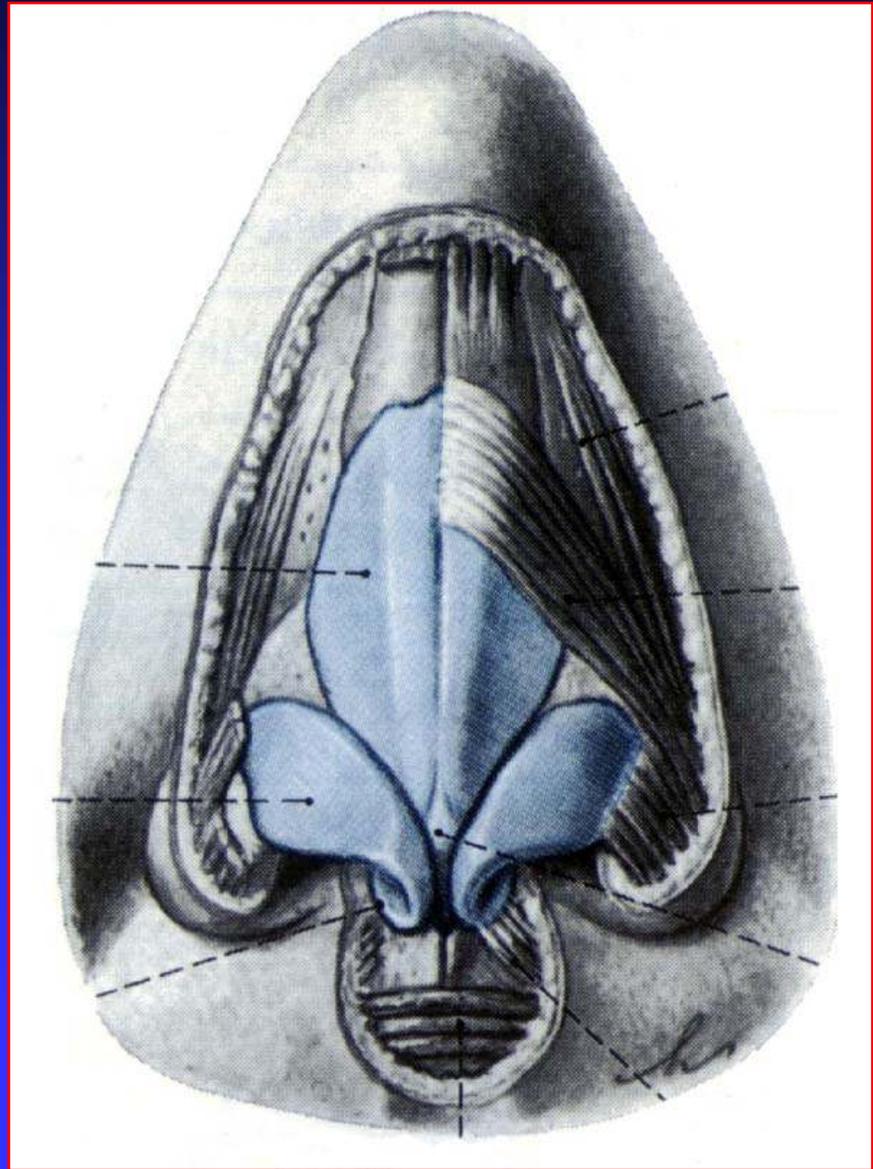

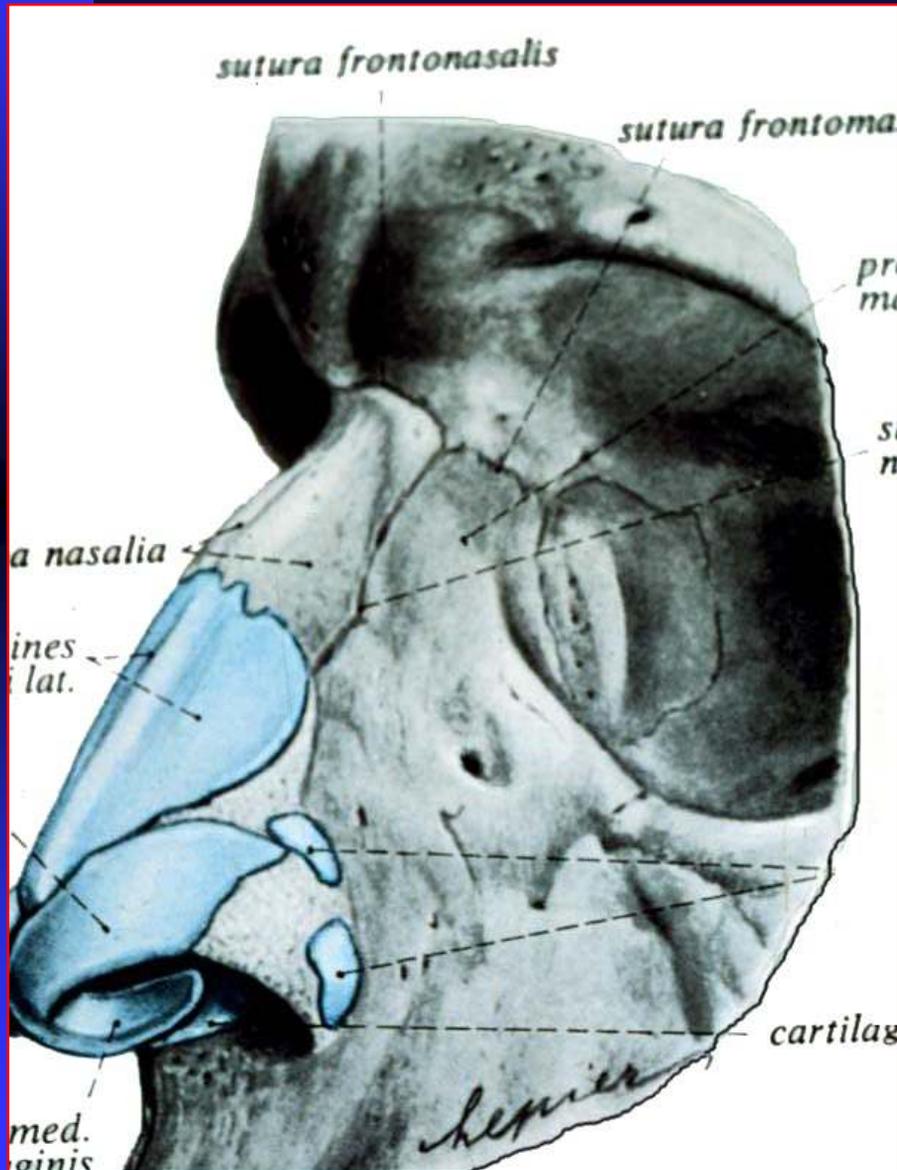

Narinas

Asa do nariz

NARIZ EXTERNO

NARIZ EXTERNO

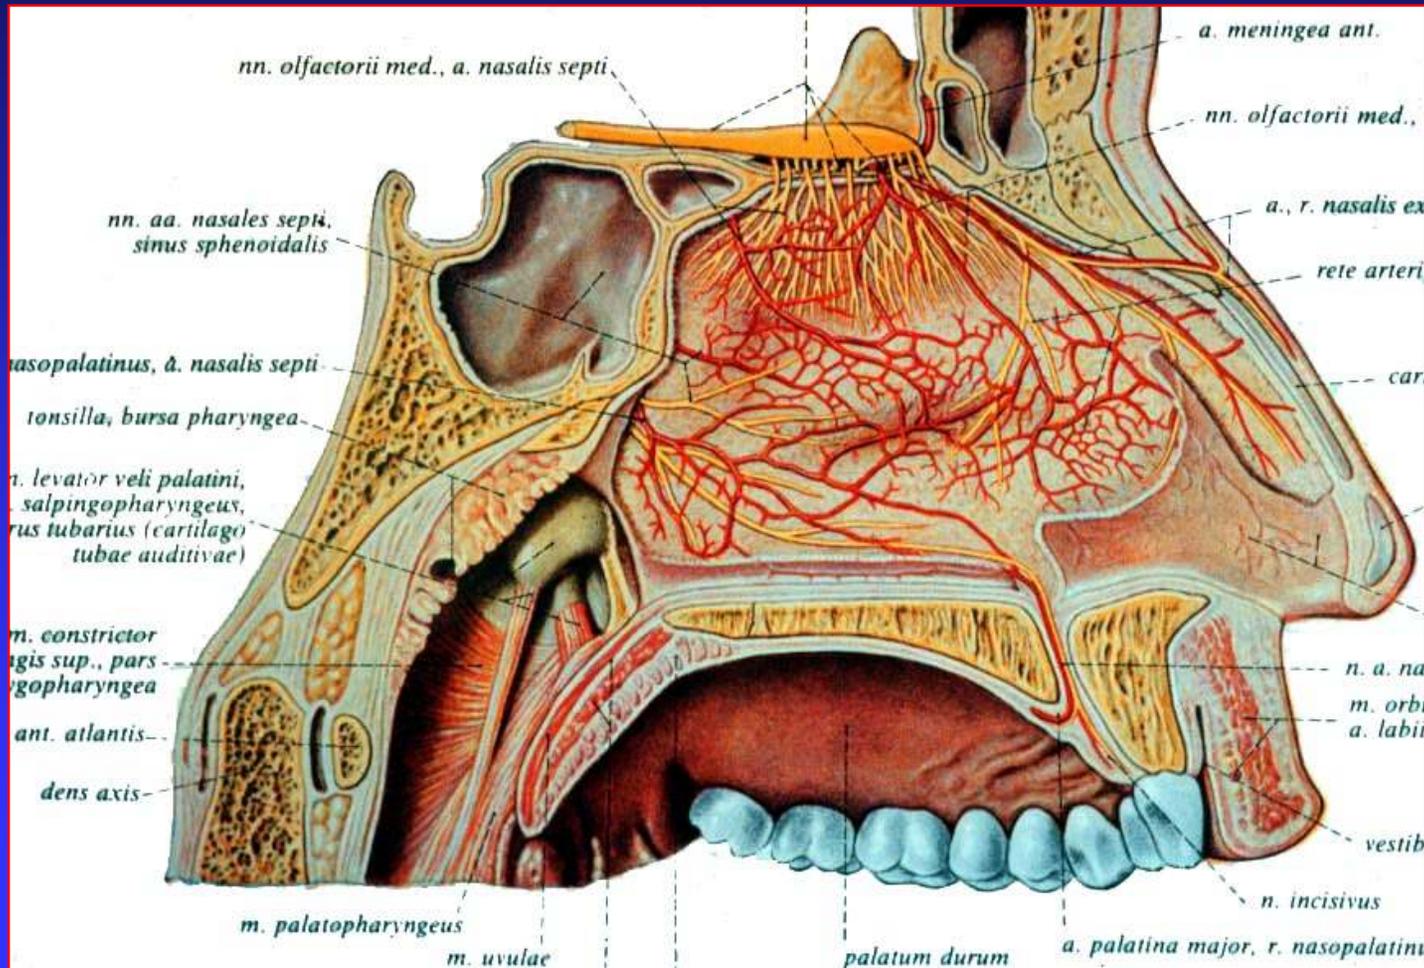

CAVIDADE NASAL

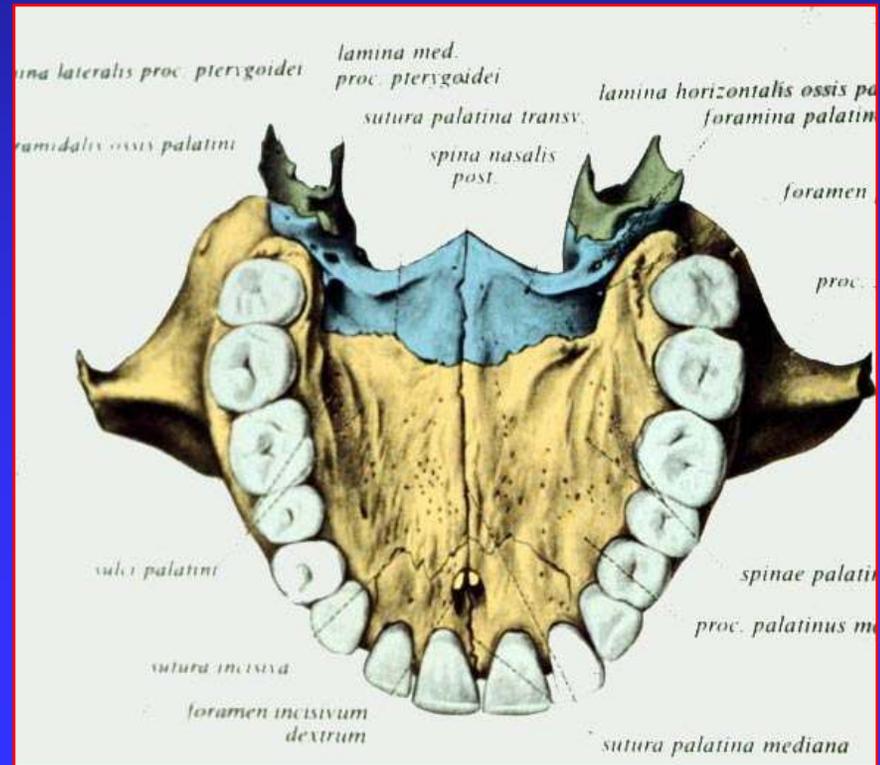

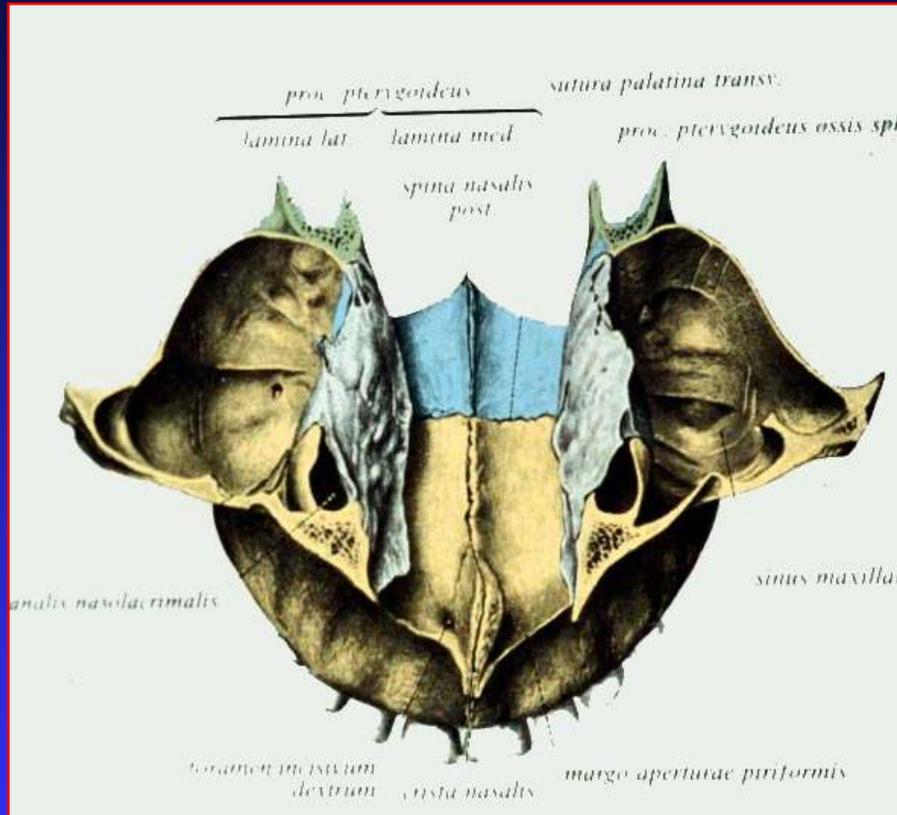

TETO

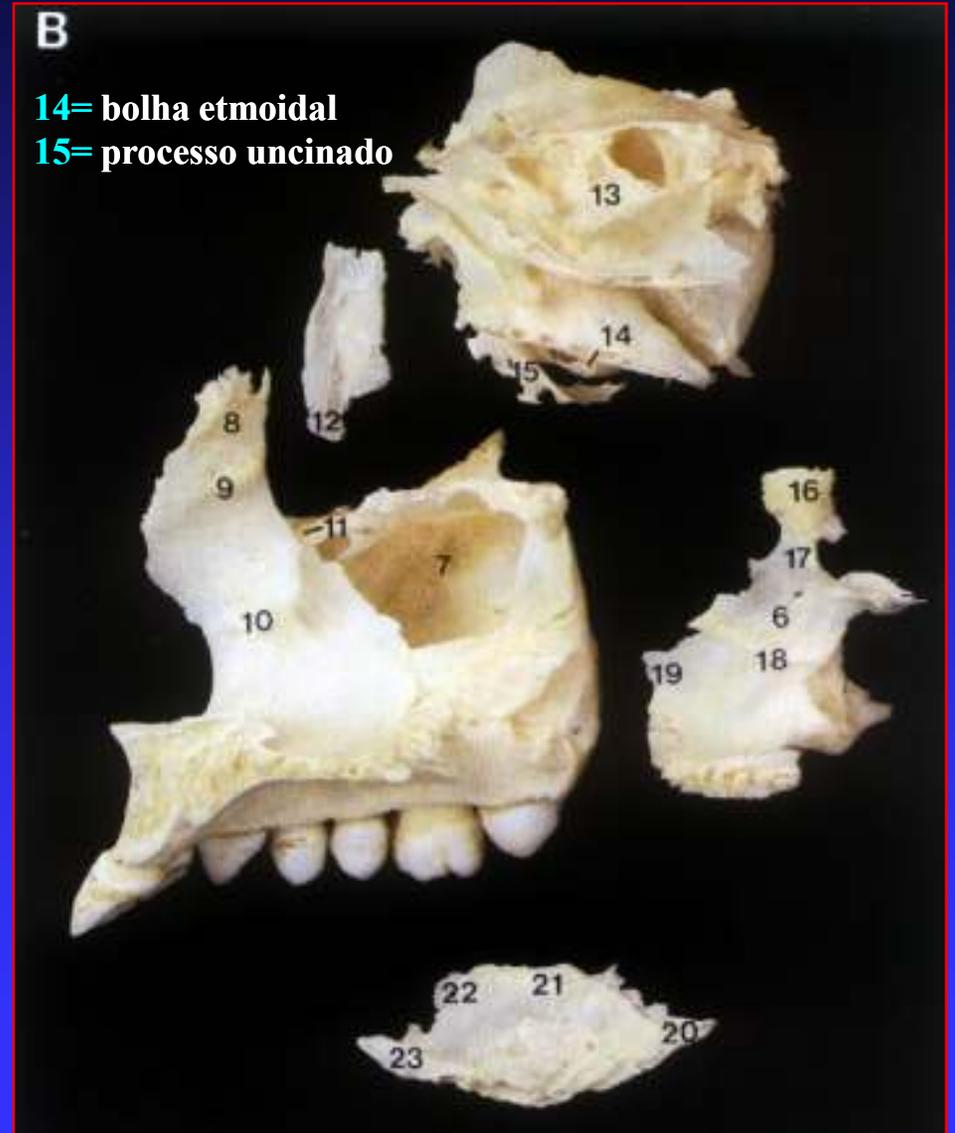

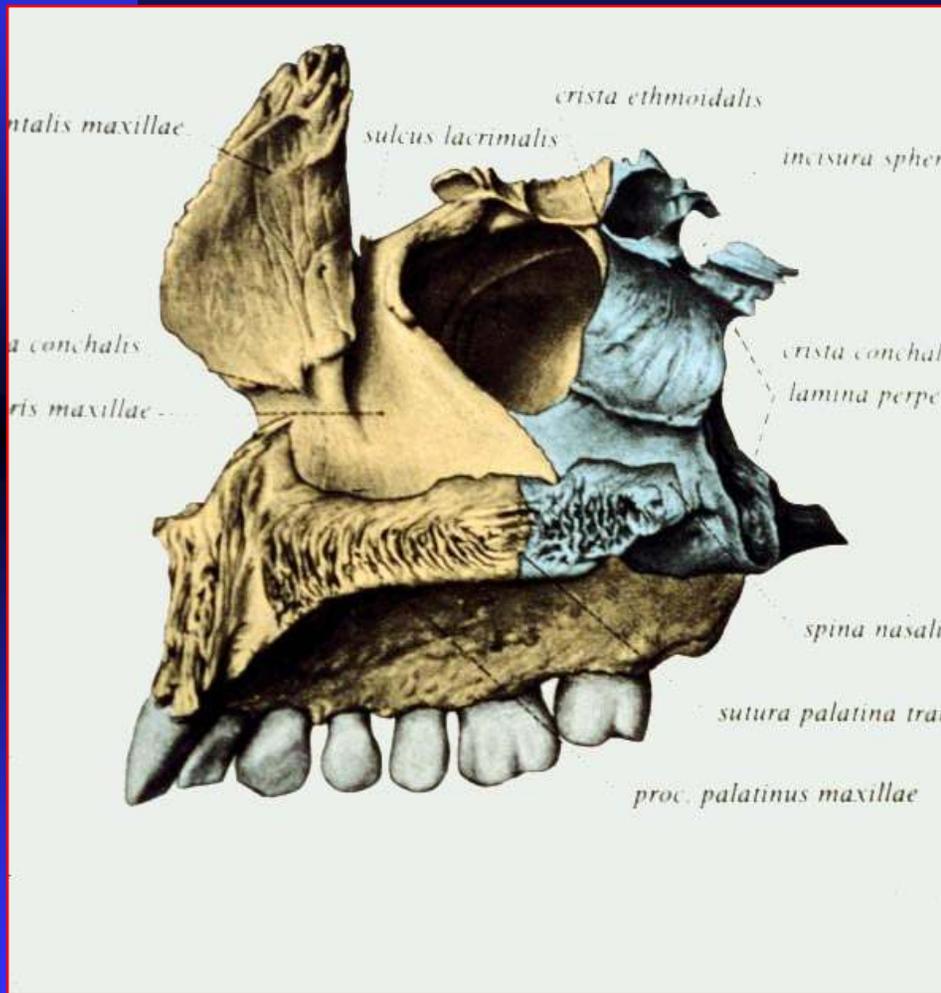

Lamina crivosa do etmóide corpo do esfenóide

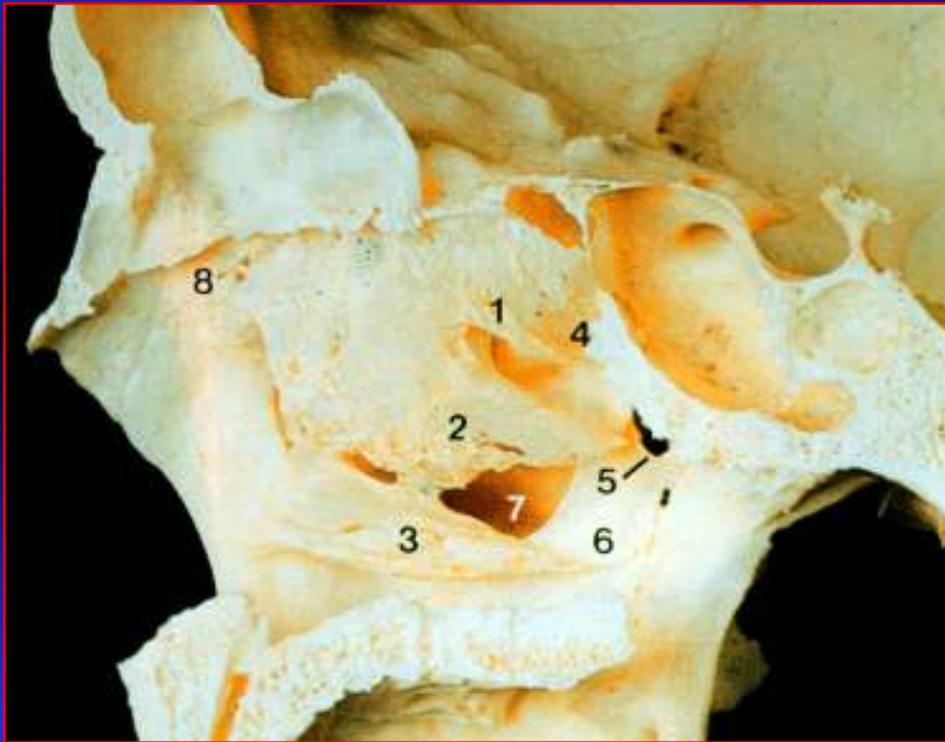

Assoalho da cavidade nasal

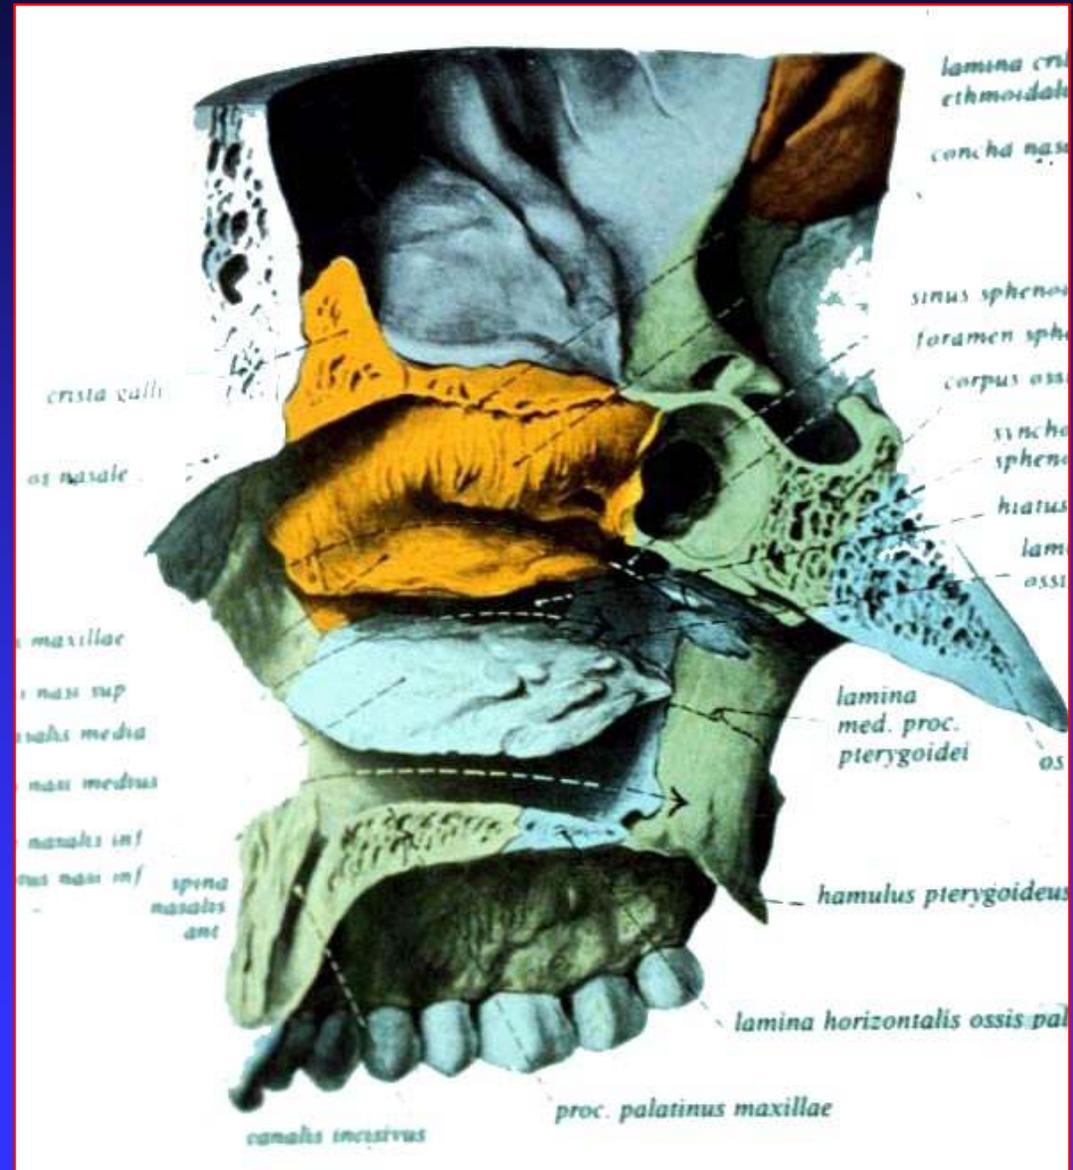

Parede lateral da cavidade nasal

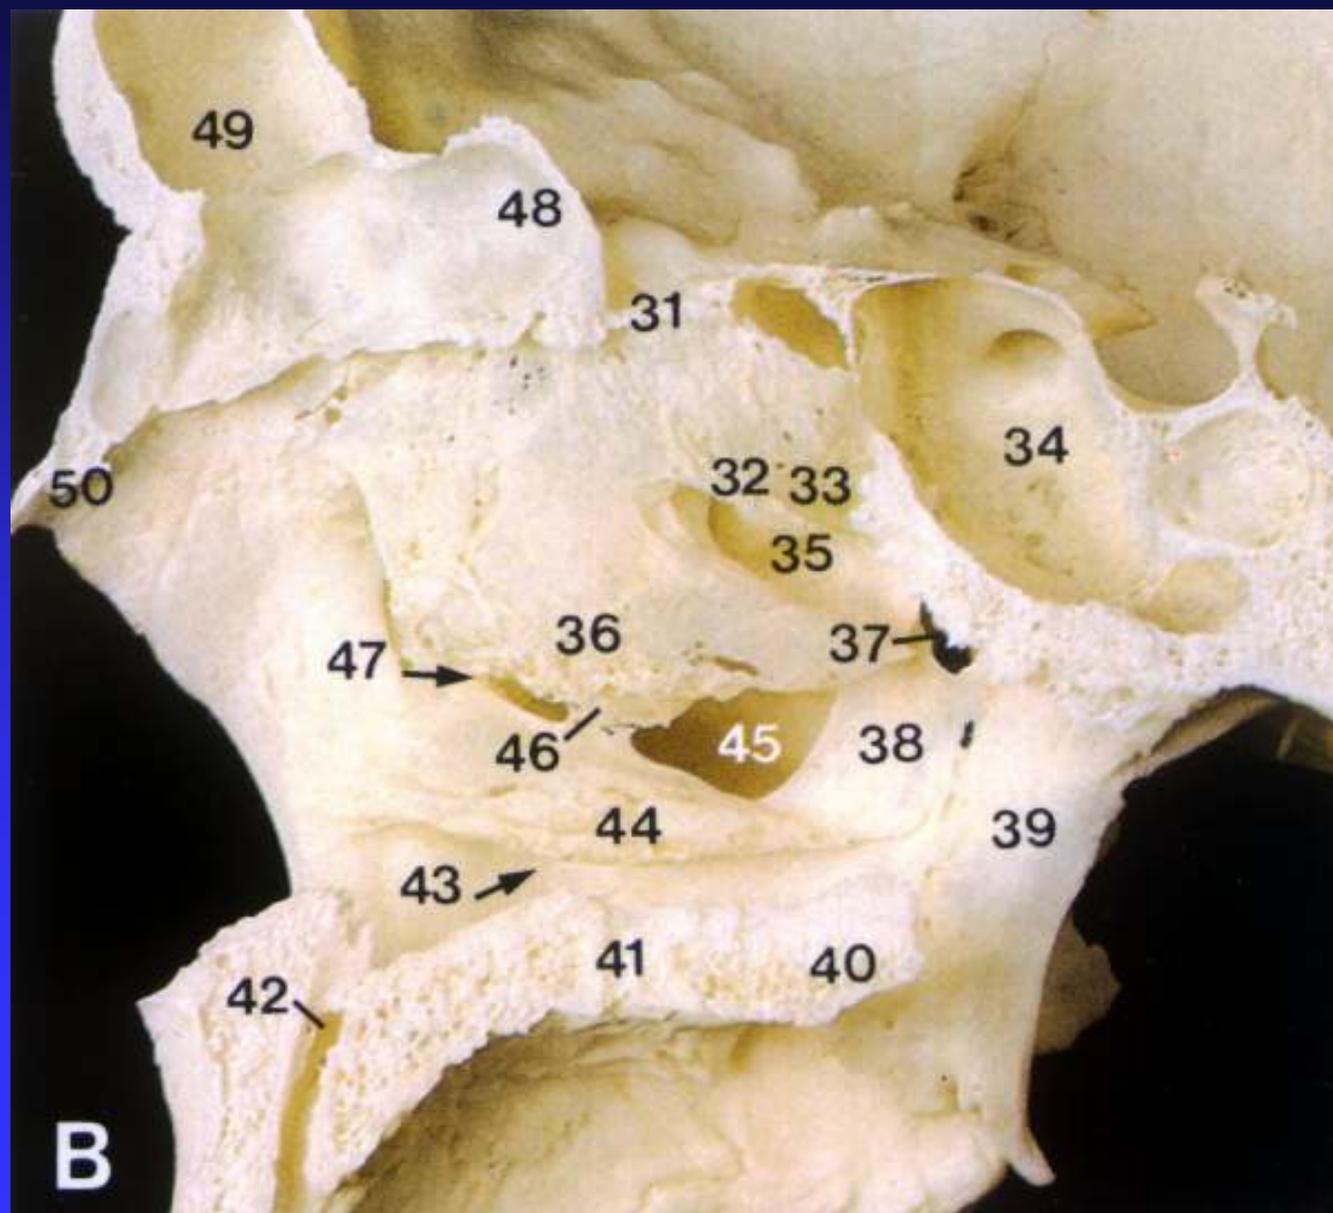

CAVIDADE NASAL

7= hiato maxilar

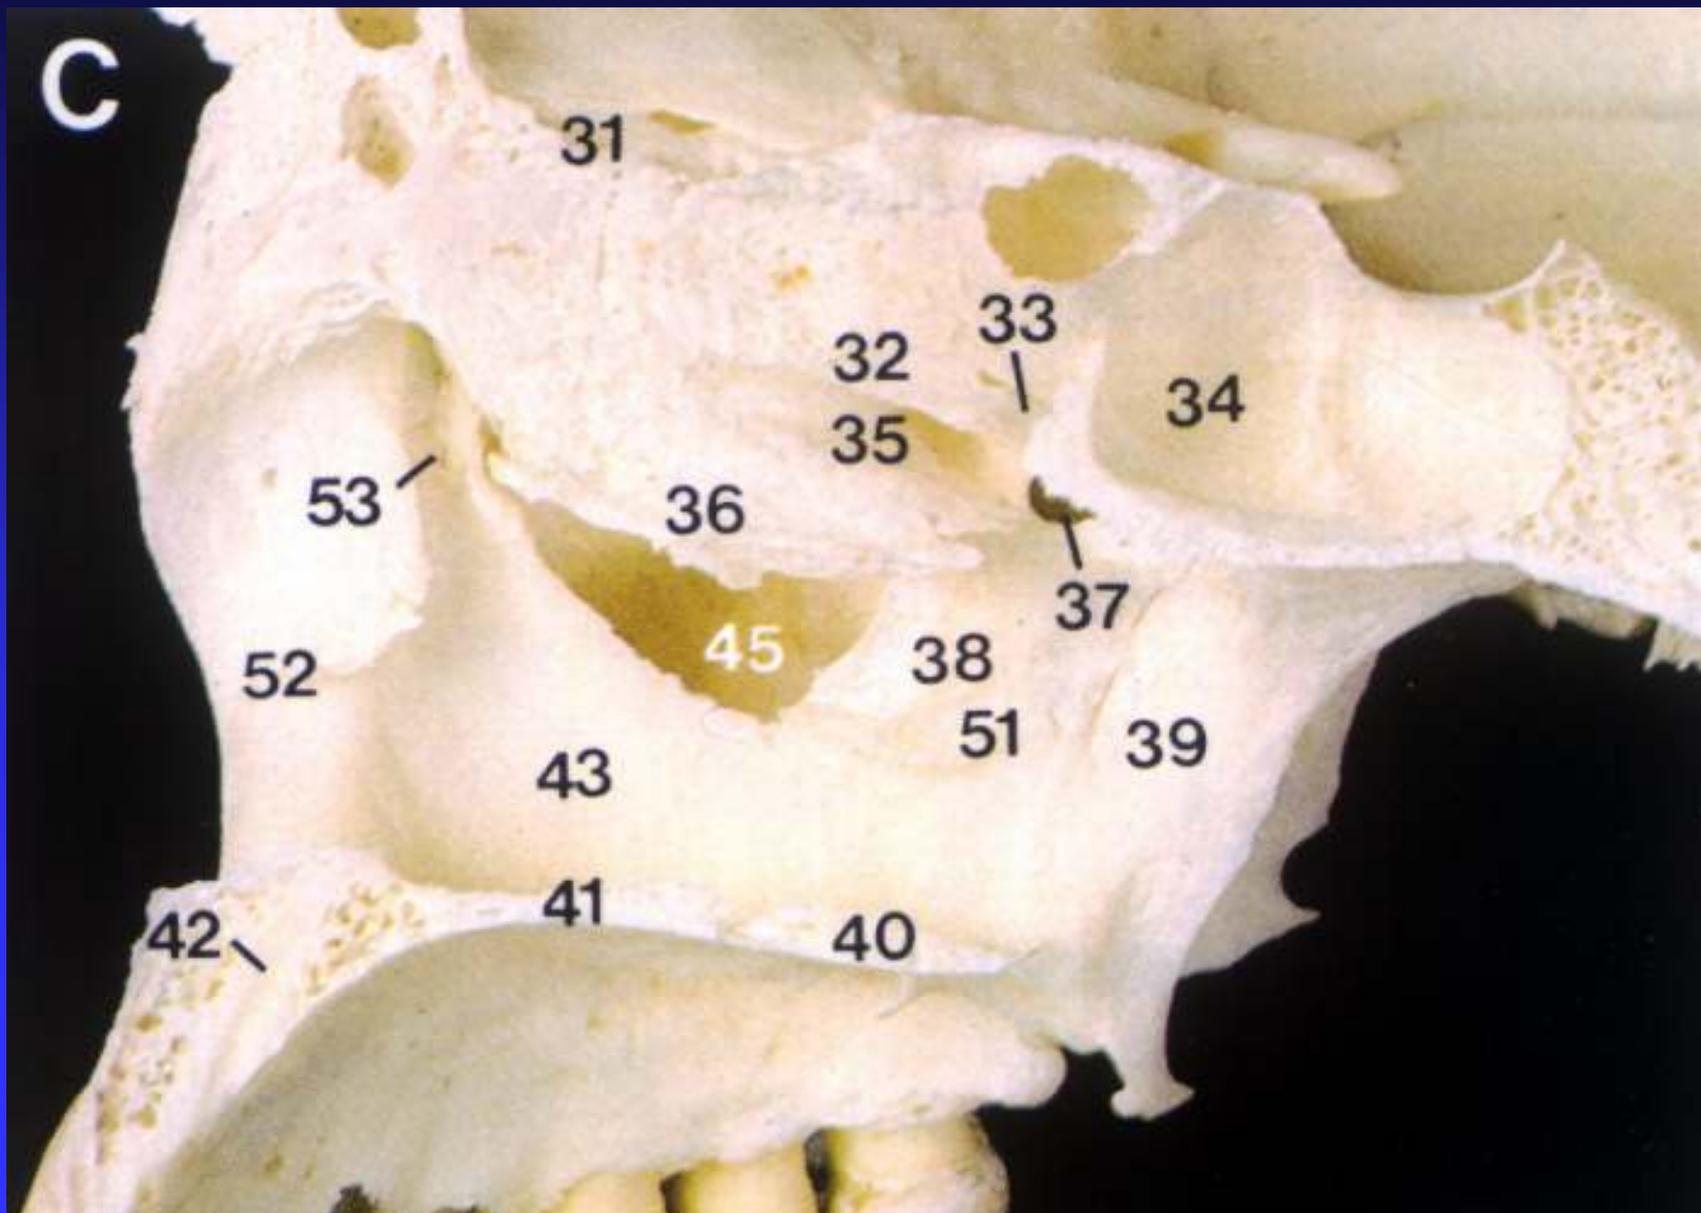

Metade direita da cavidade nasal

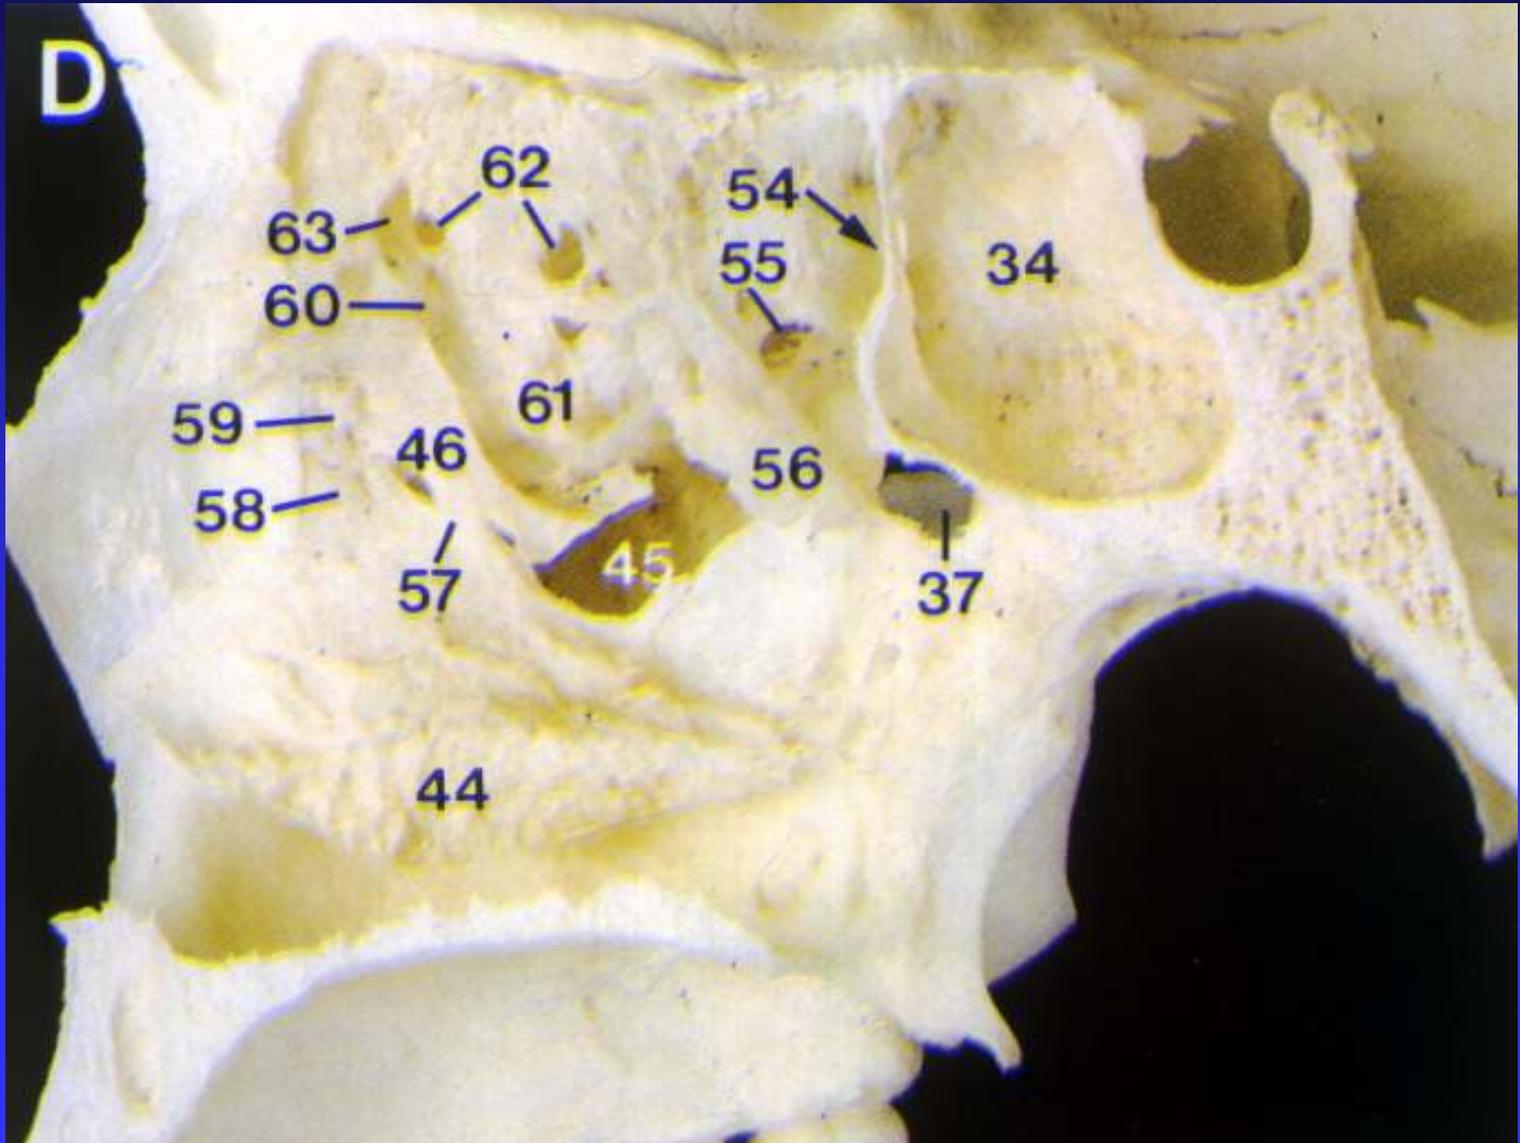

46= processo uncinado

B

Após a remoção da concha inferior

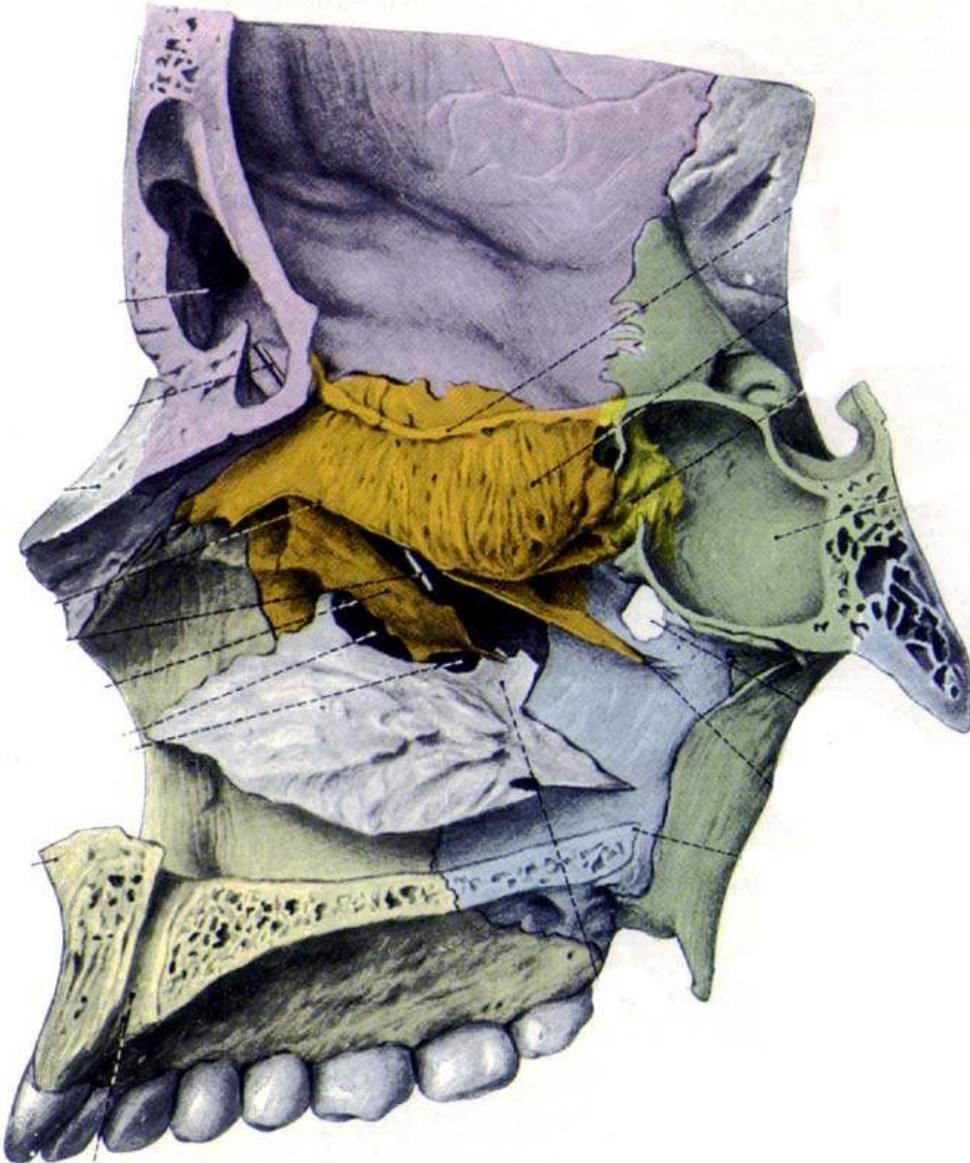

Após a remoção da concha média

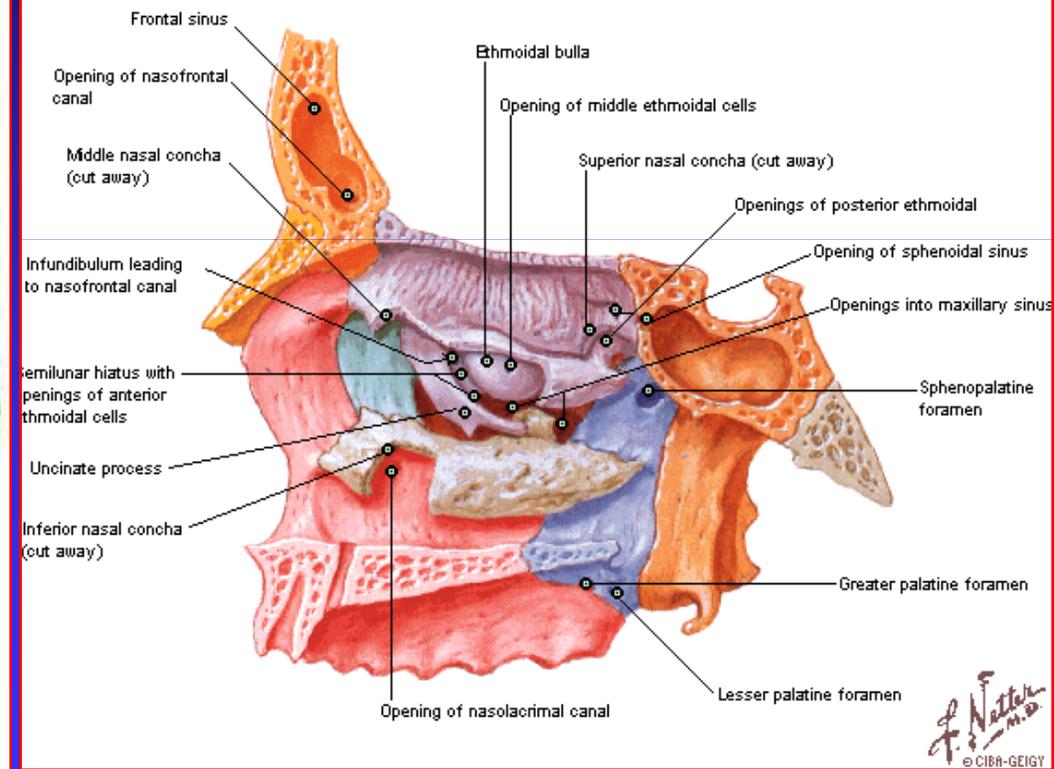

61= bolha etmoidal
46= processo uncinado

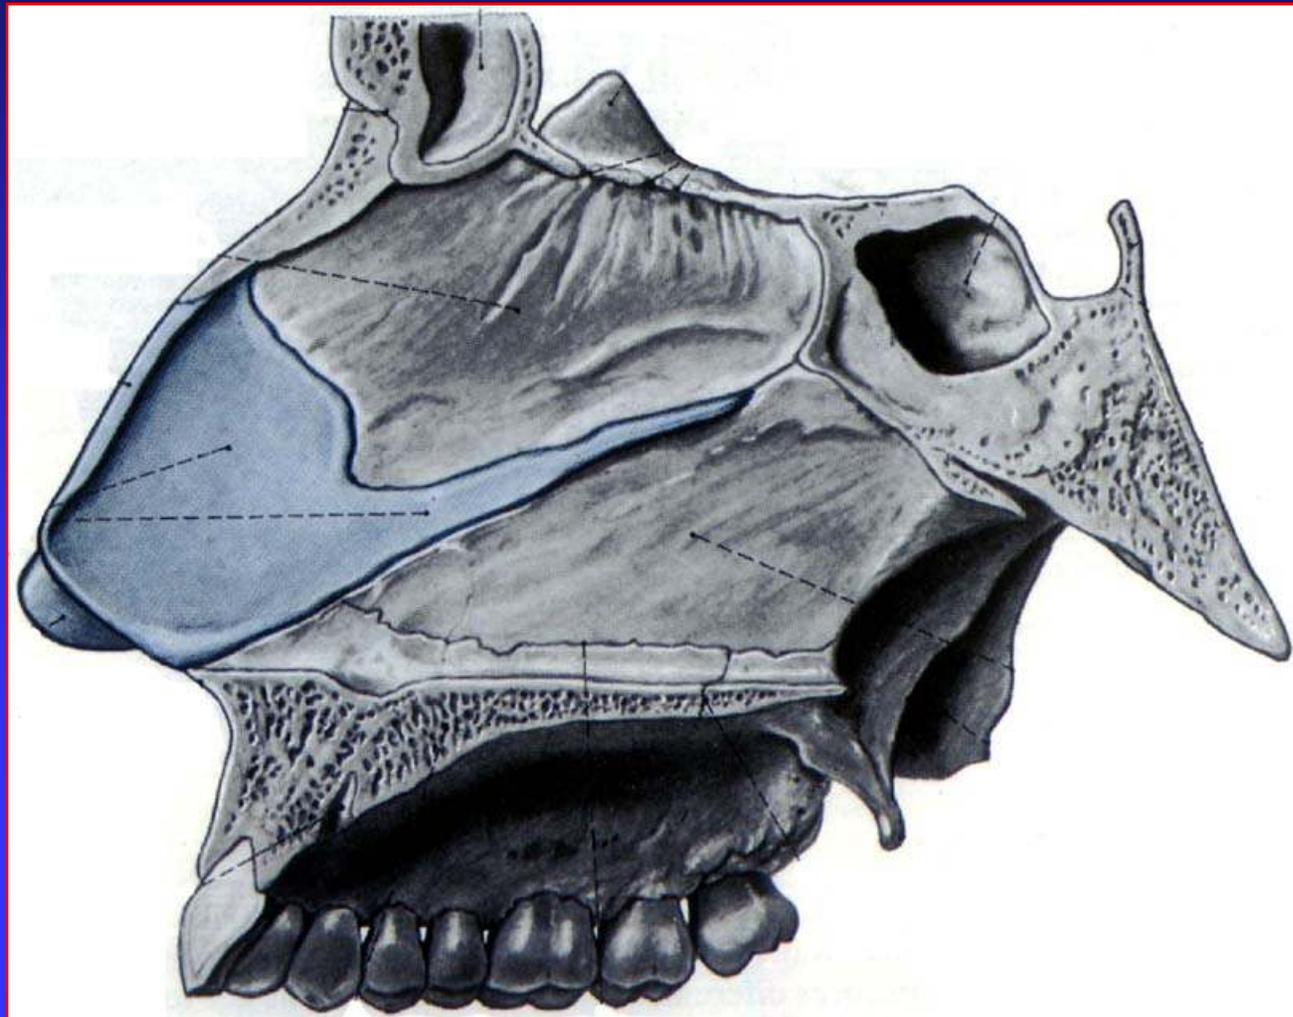

CAVIDADE NASAL

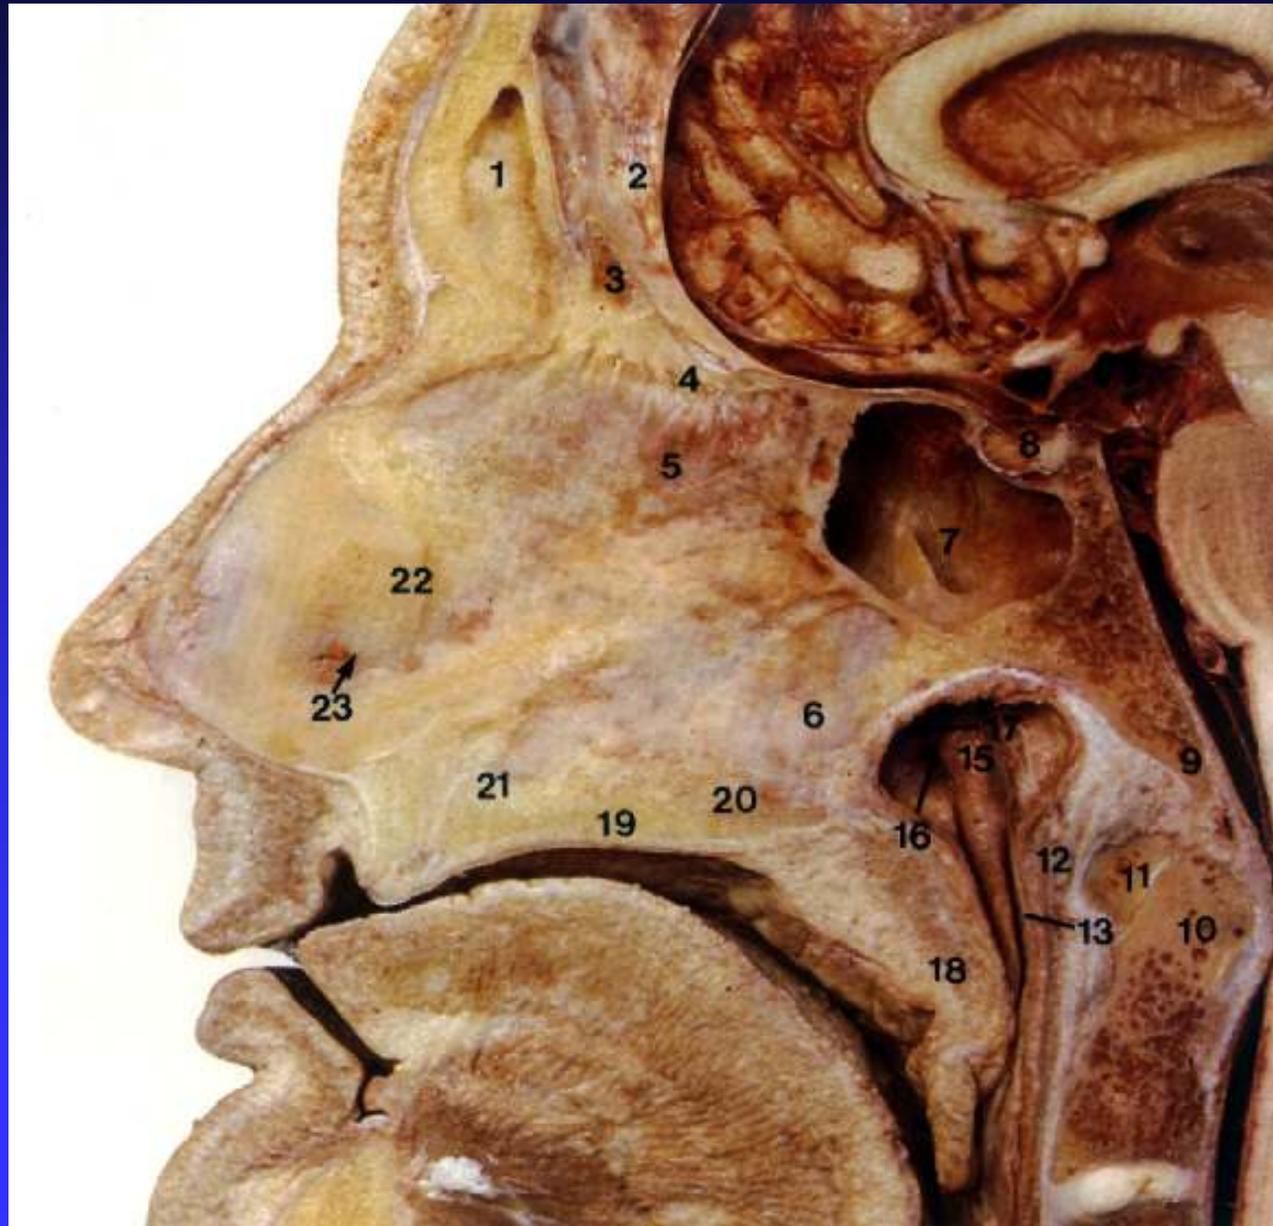

Lateral Nasal Wall - Bony Structure Nasal Conchae Partly Removed

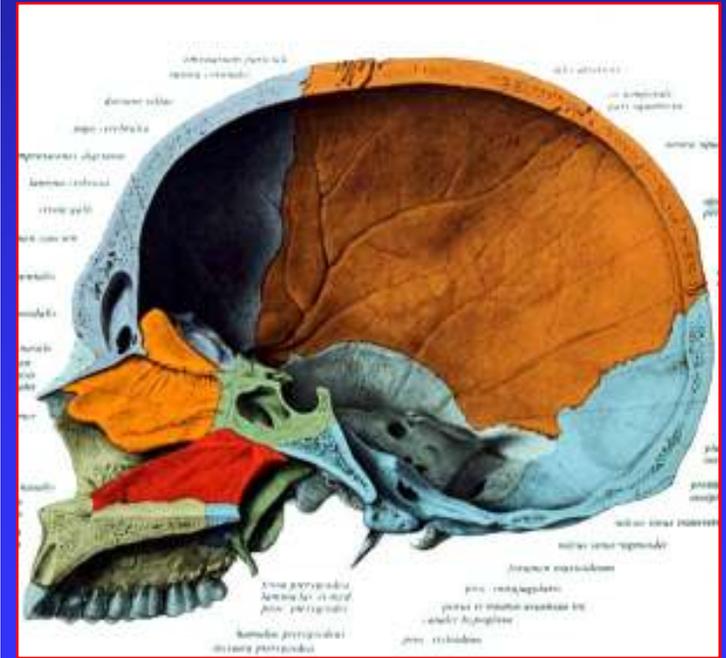

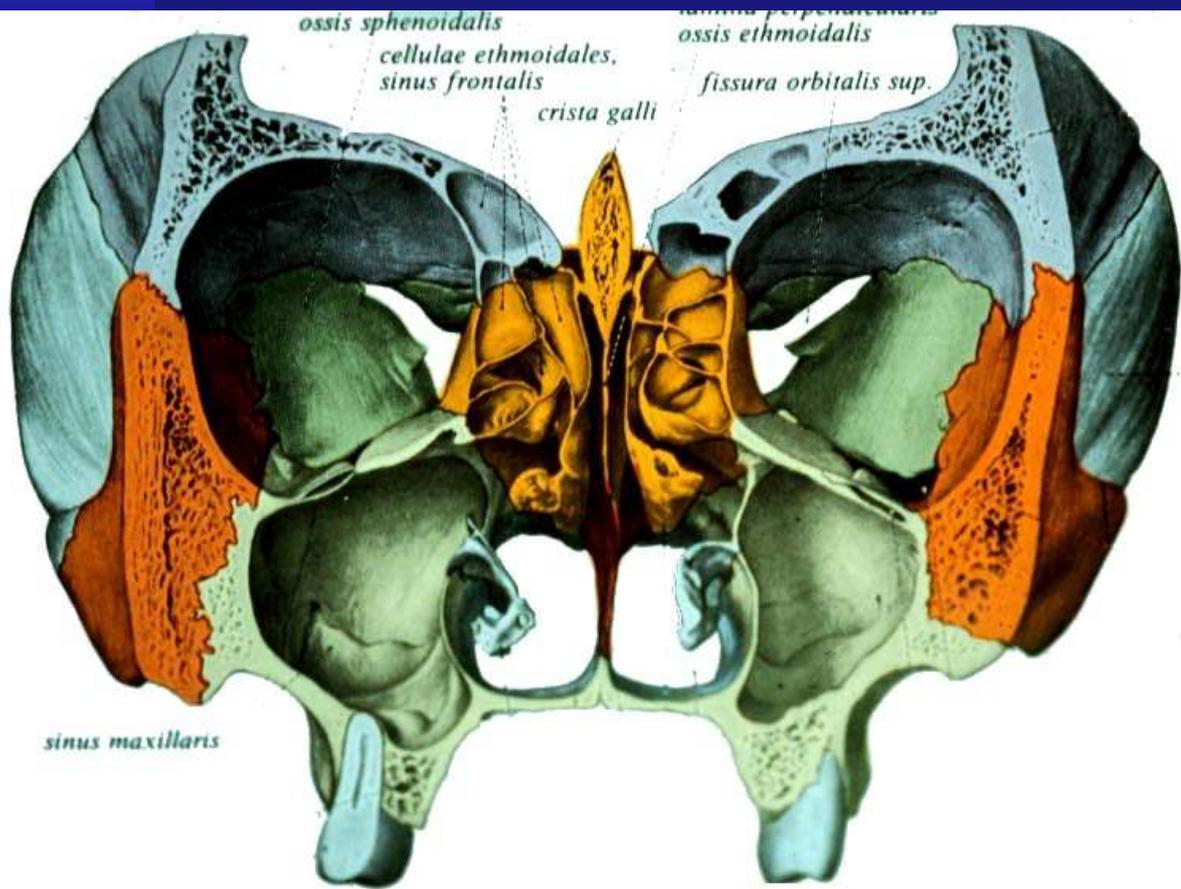

Septo nasal

Septo nasal

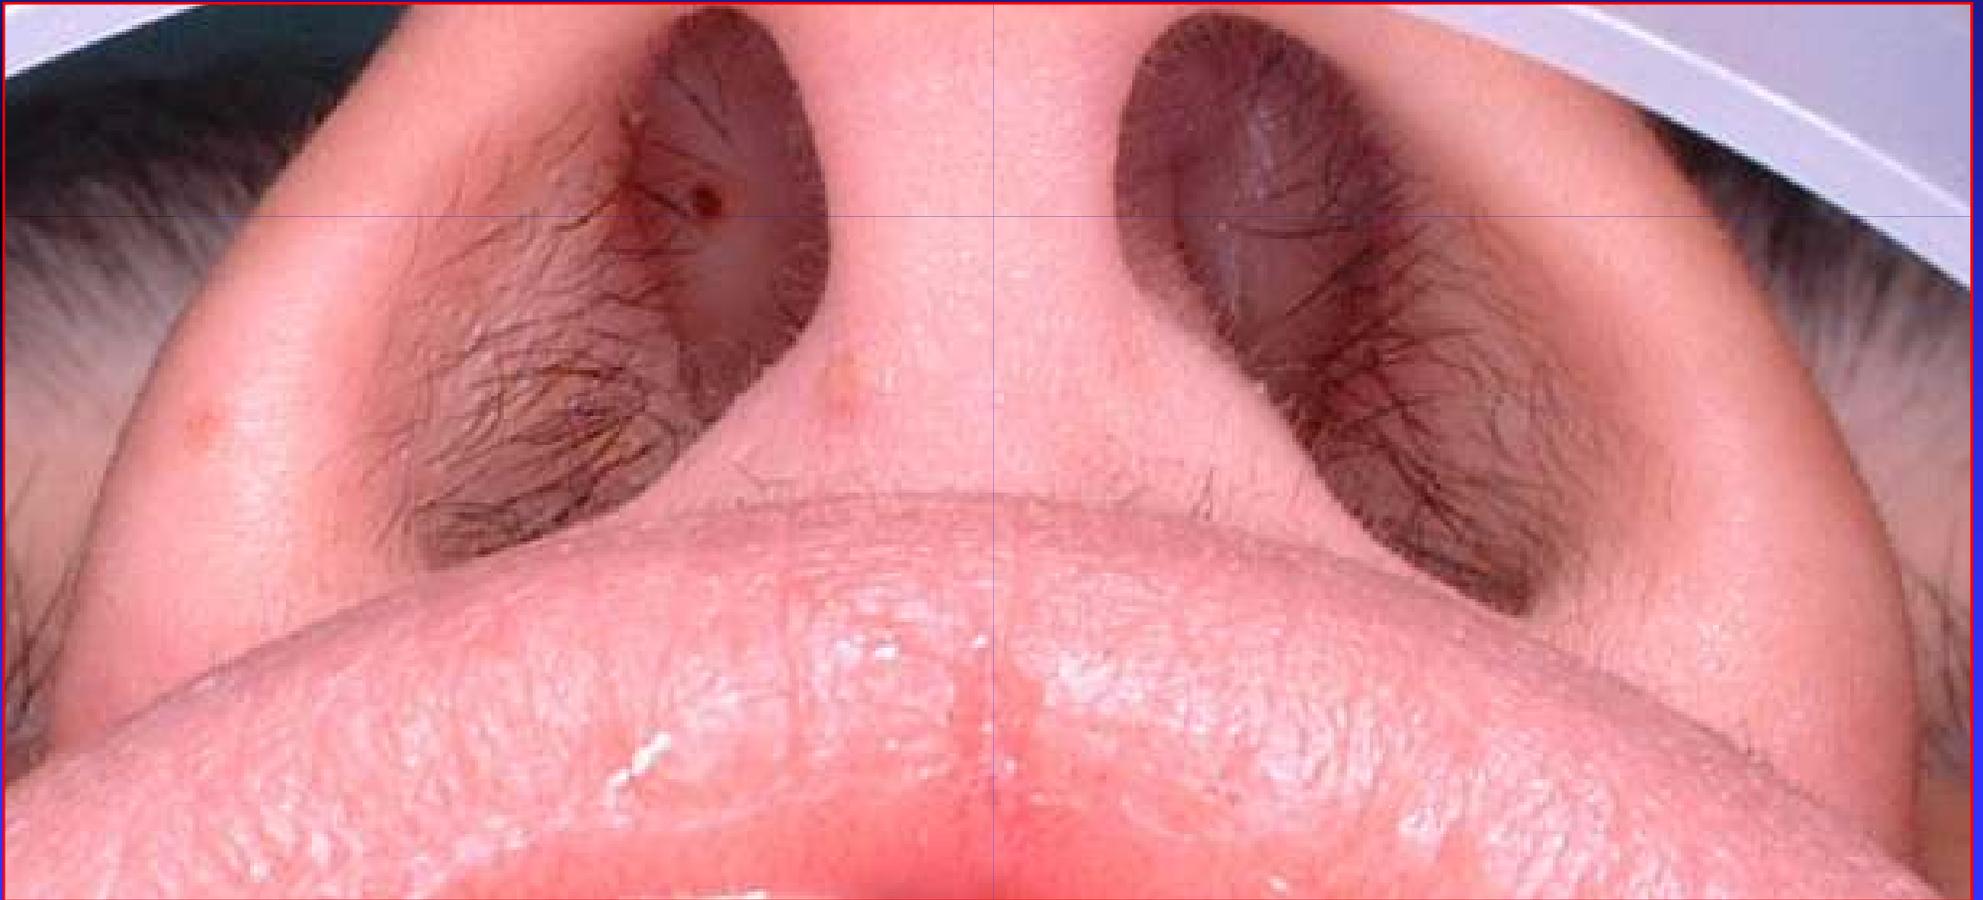

CAVIDADE NASAL

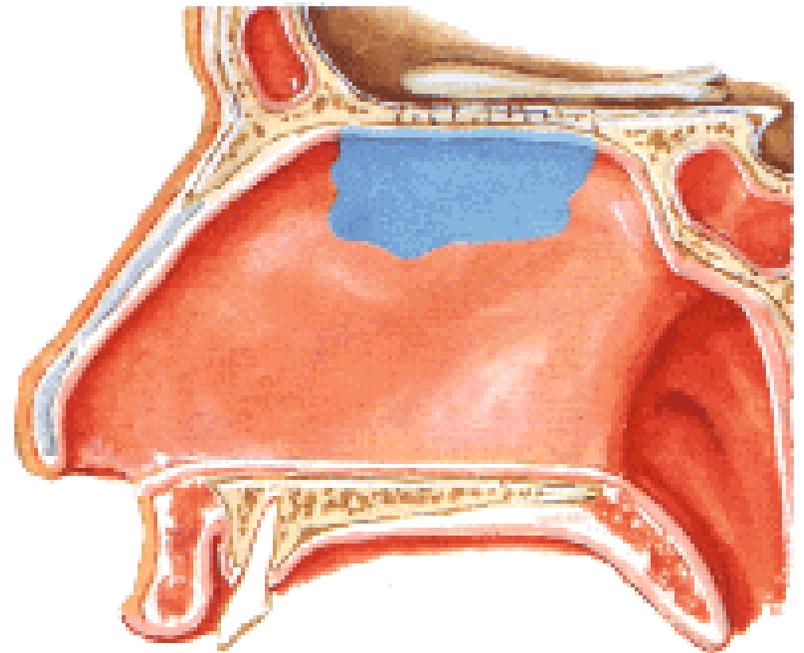

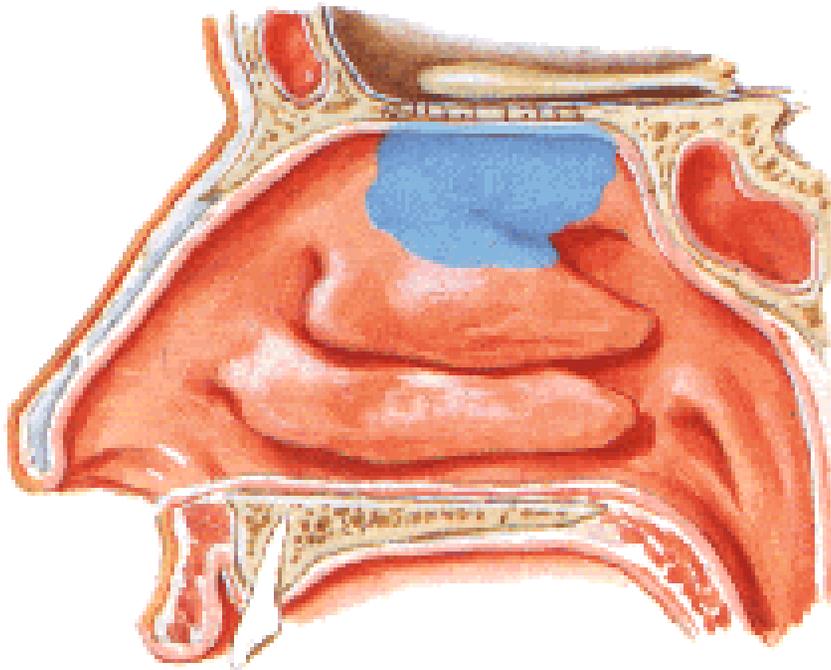

VESTÍBULO

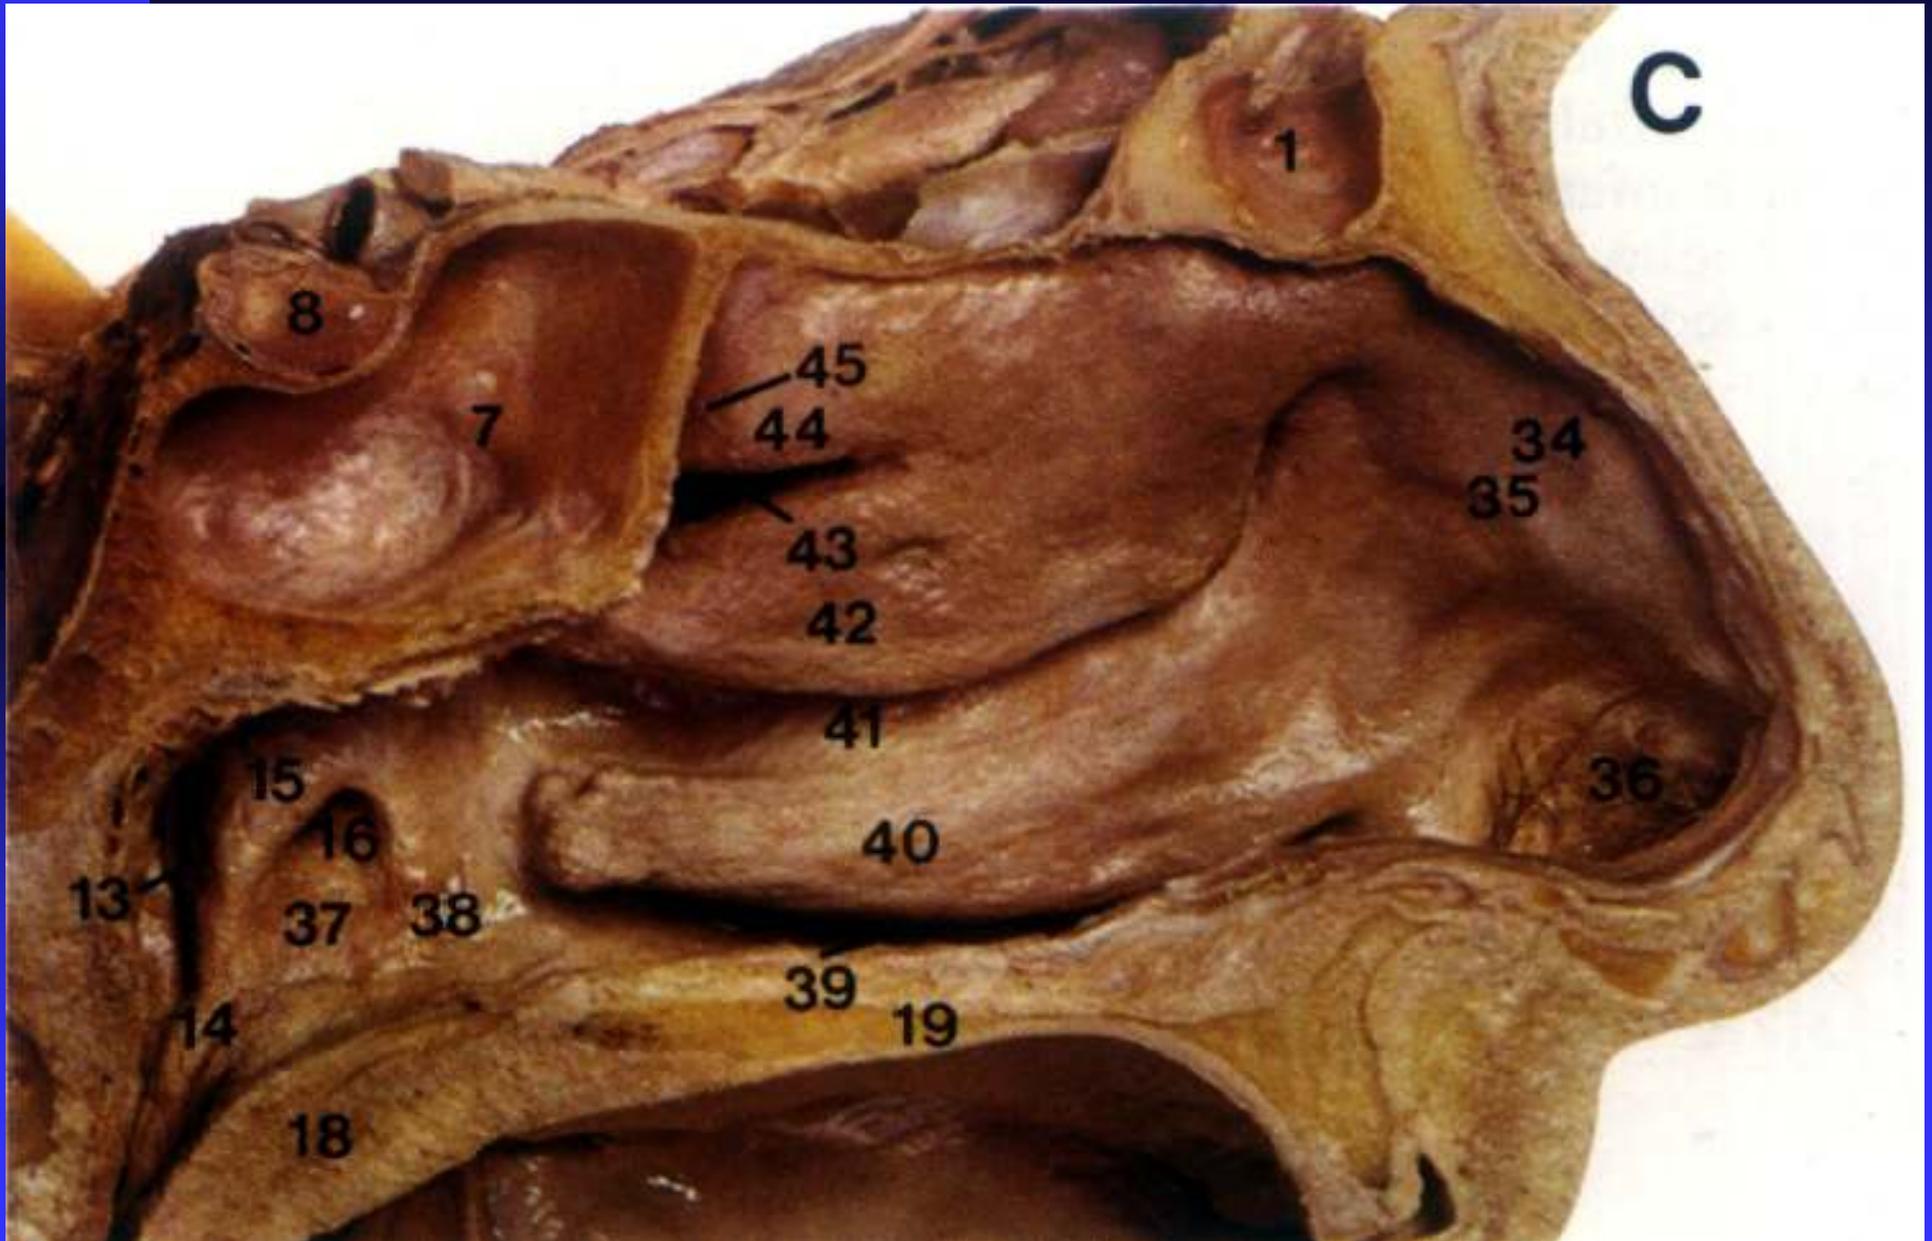

Porção dilatada revestida por cútis
Vibrissas

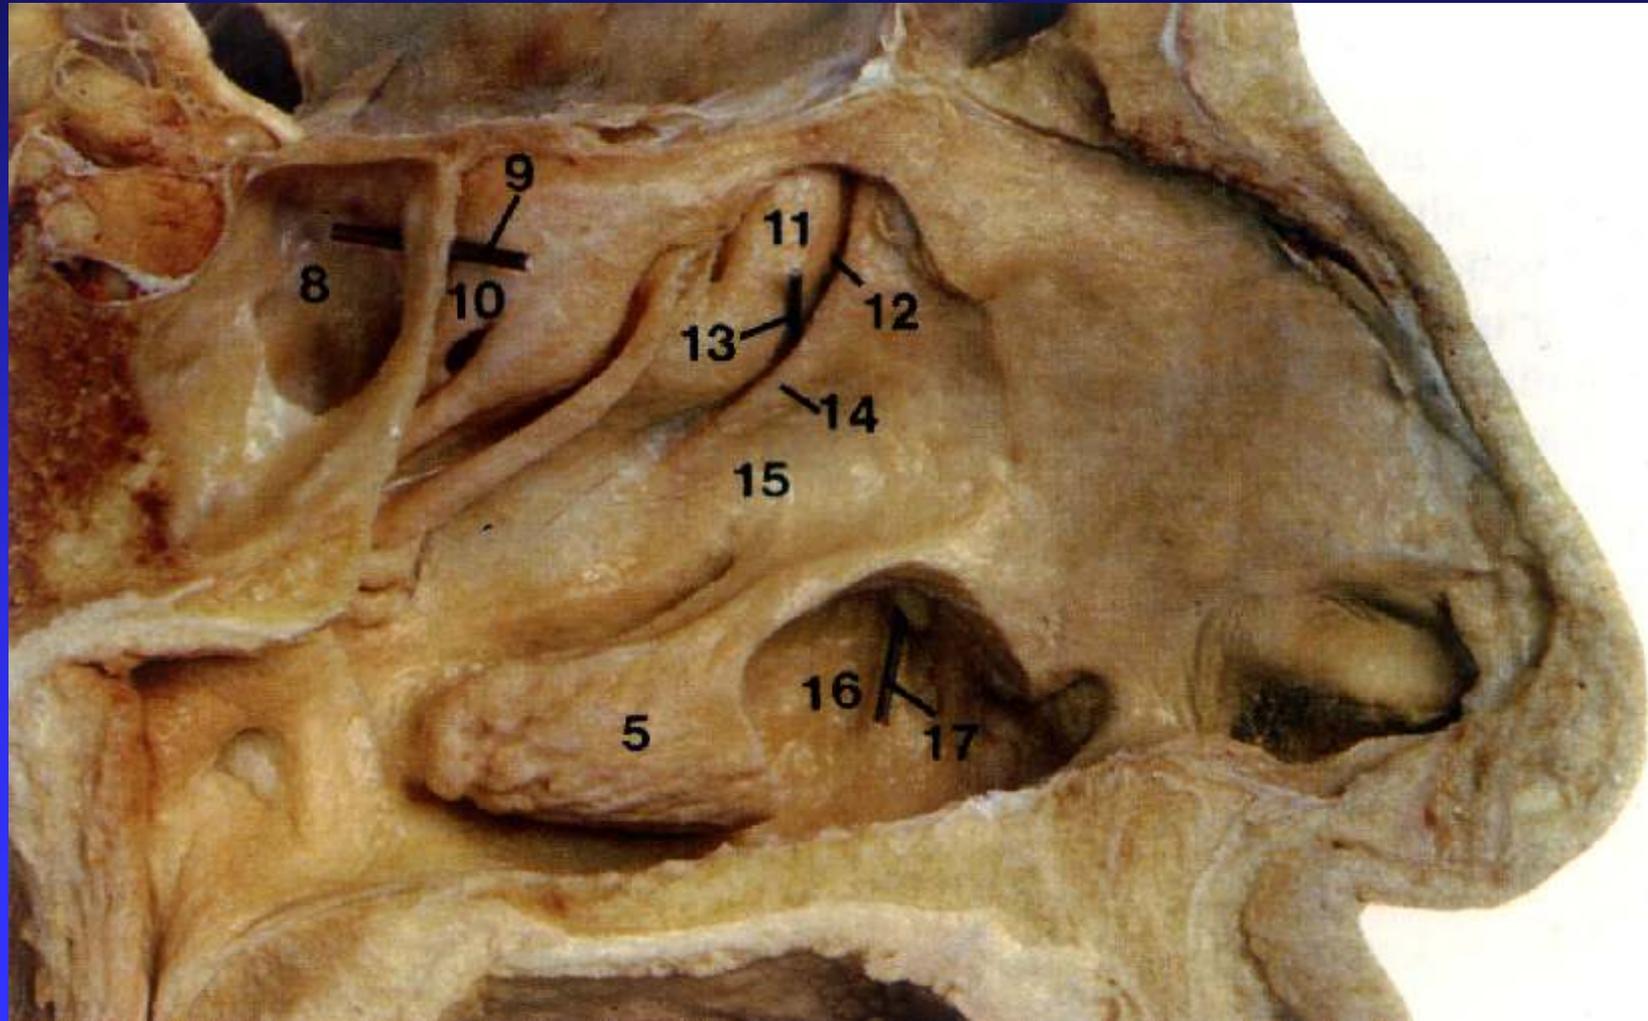

MUCOSA OLFATÓRIA

Parede lateral

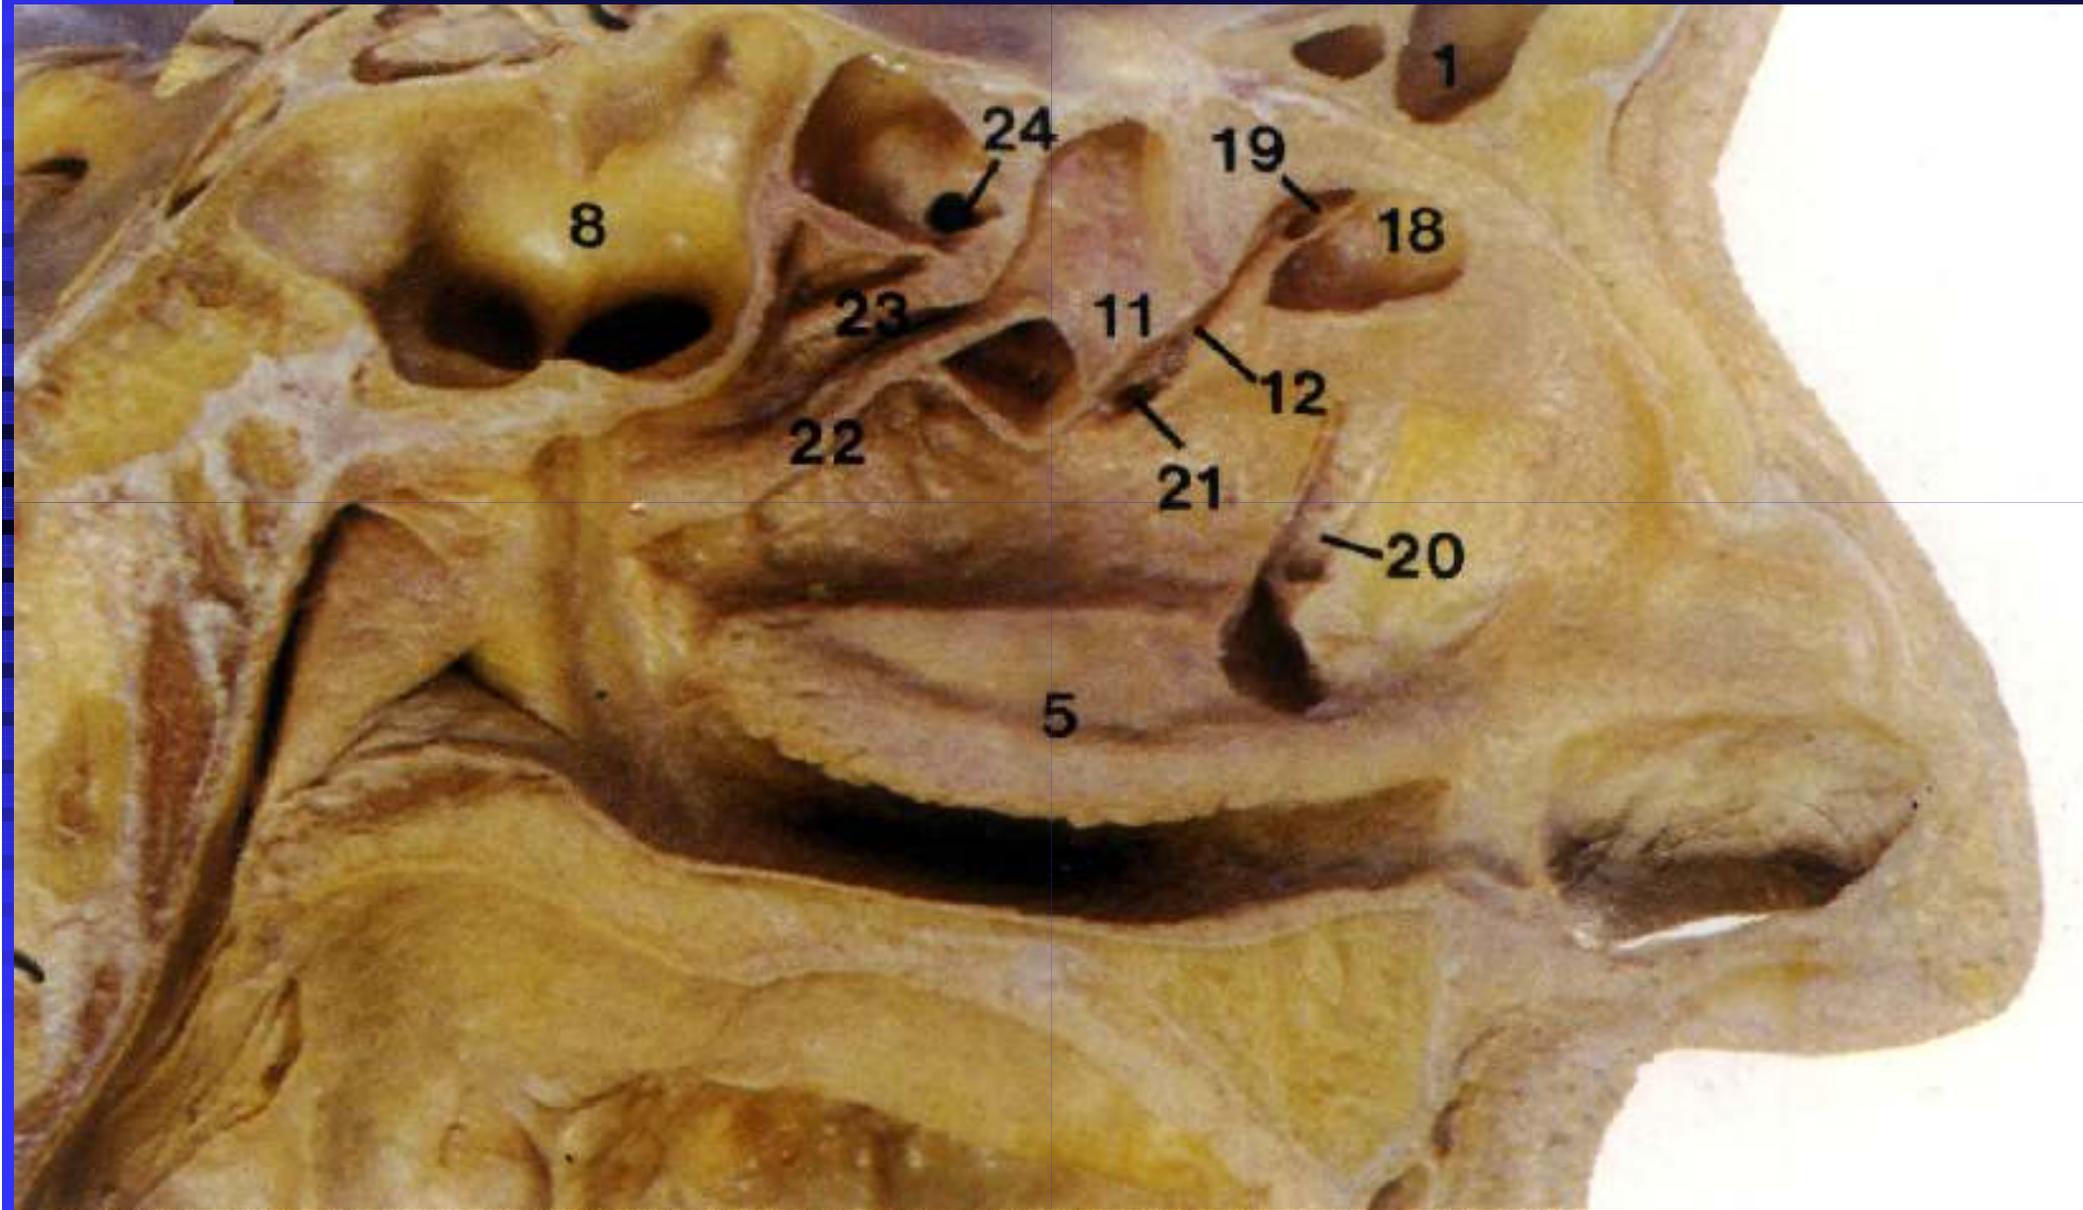

Parede lateral após a remoção da concha nasal média e parte da inferior

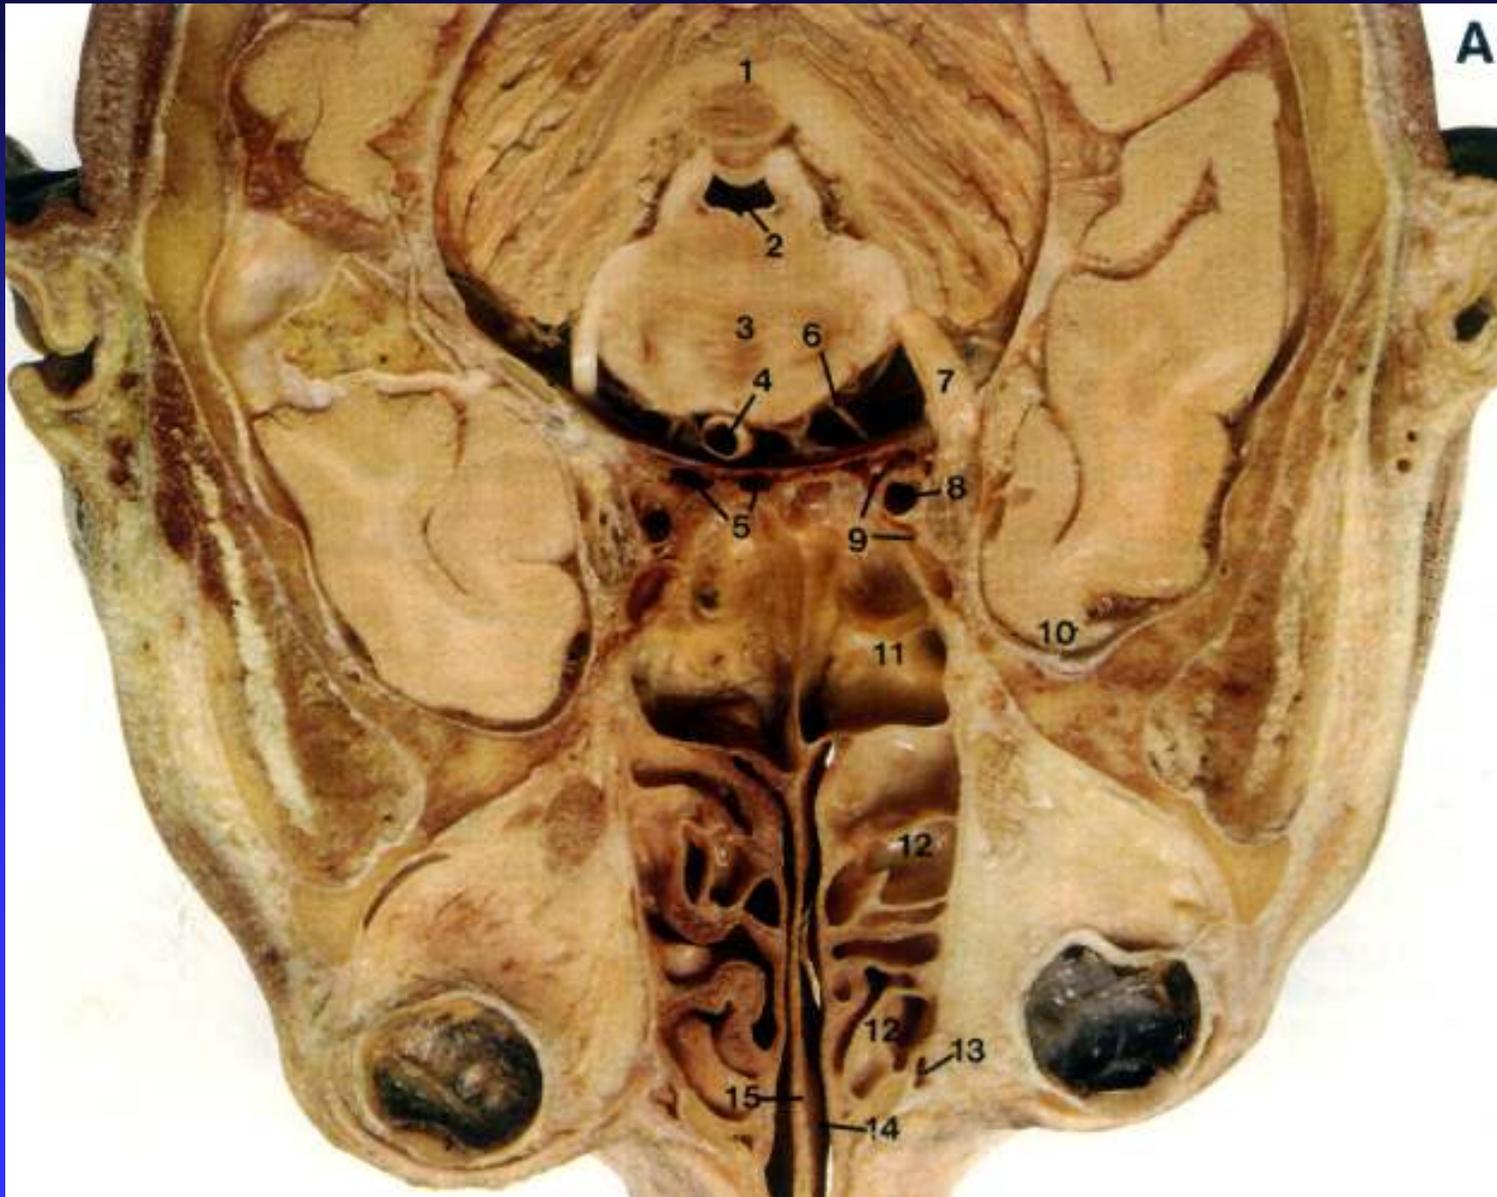

11= bolha etmoidal
14= processo uncinado

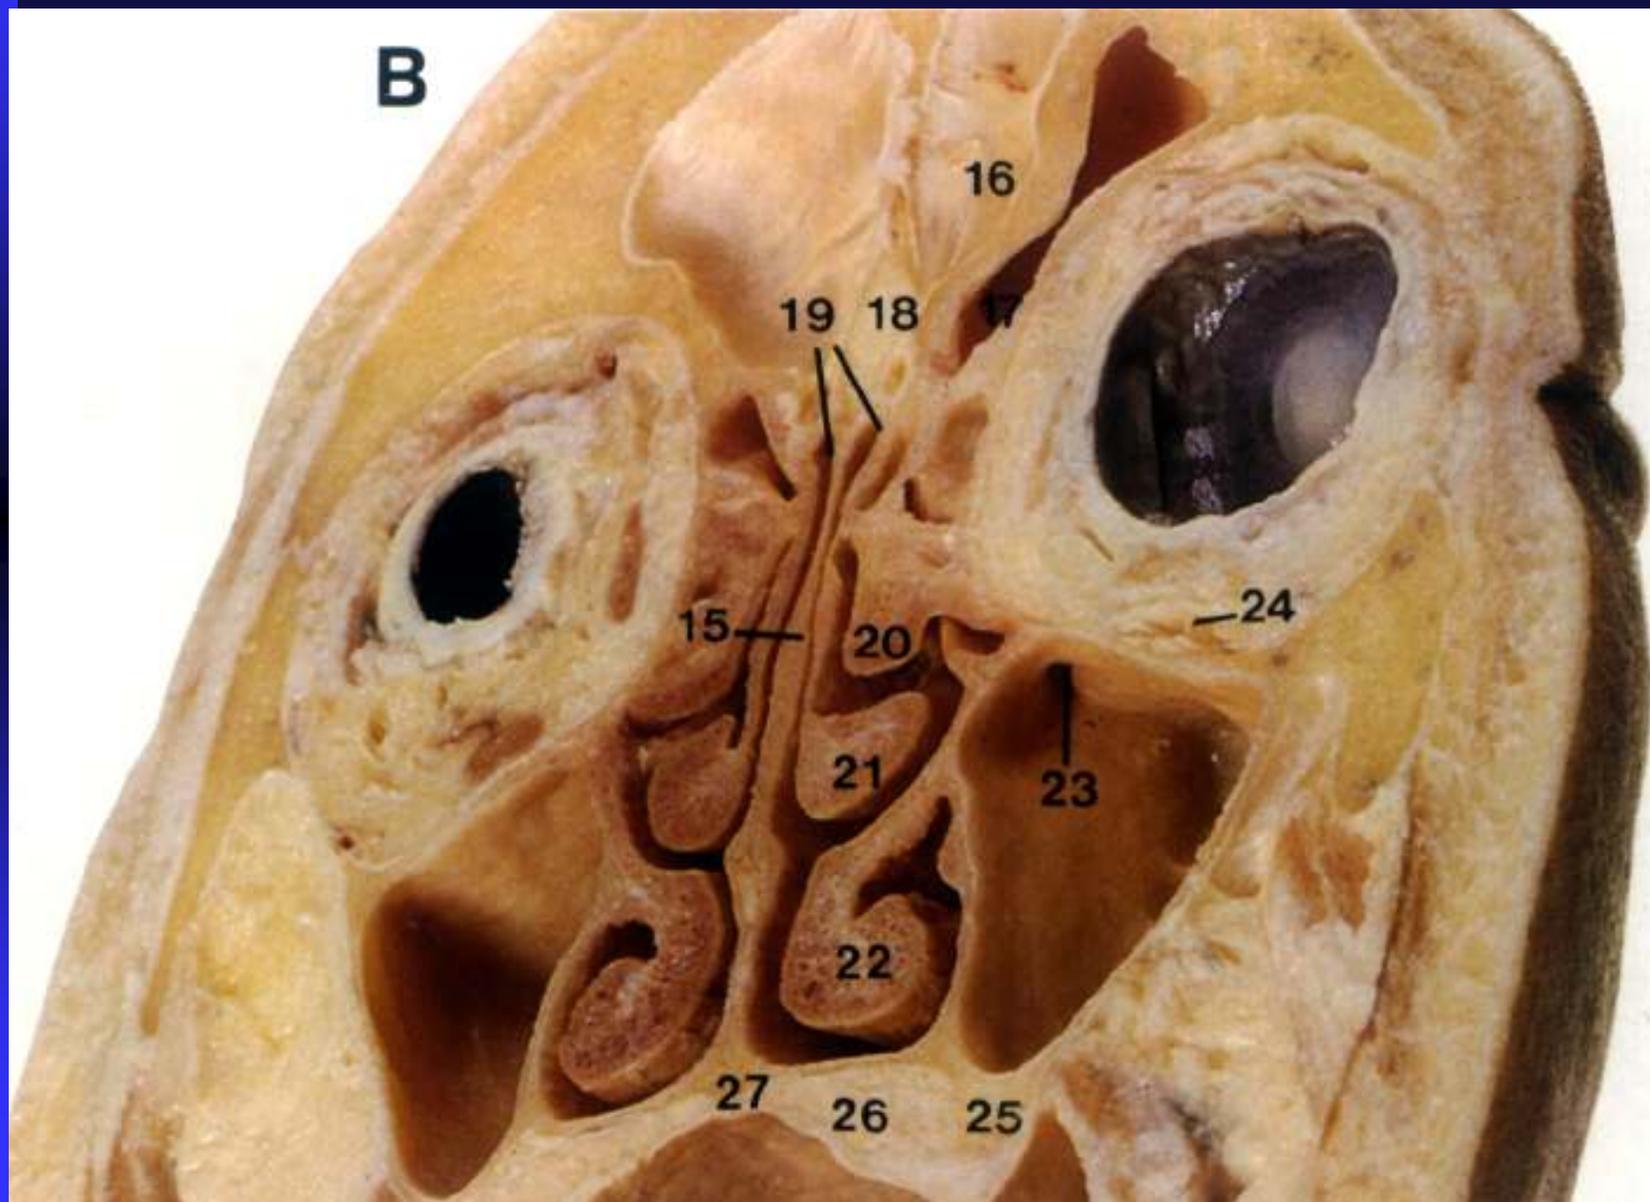

Ducto nasolacrimal (20)

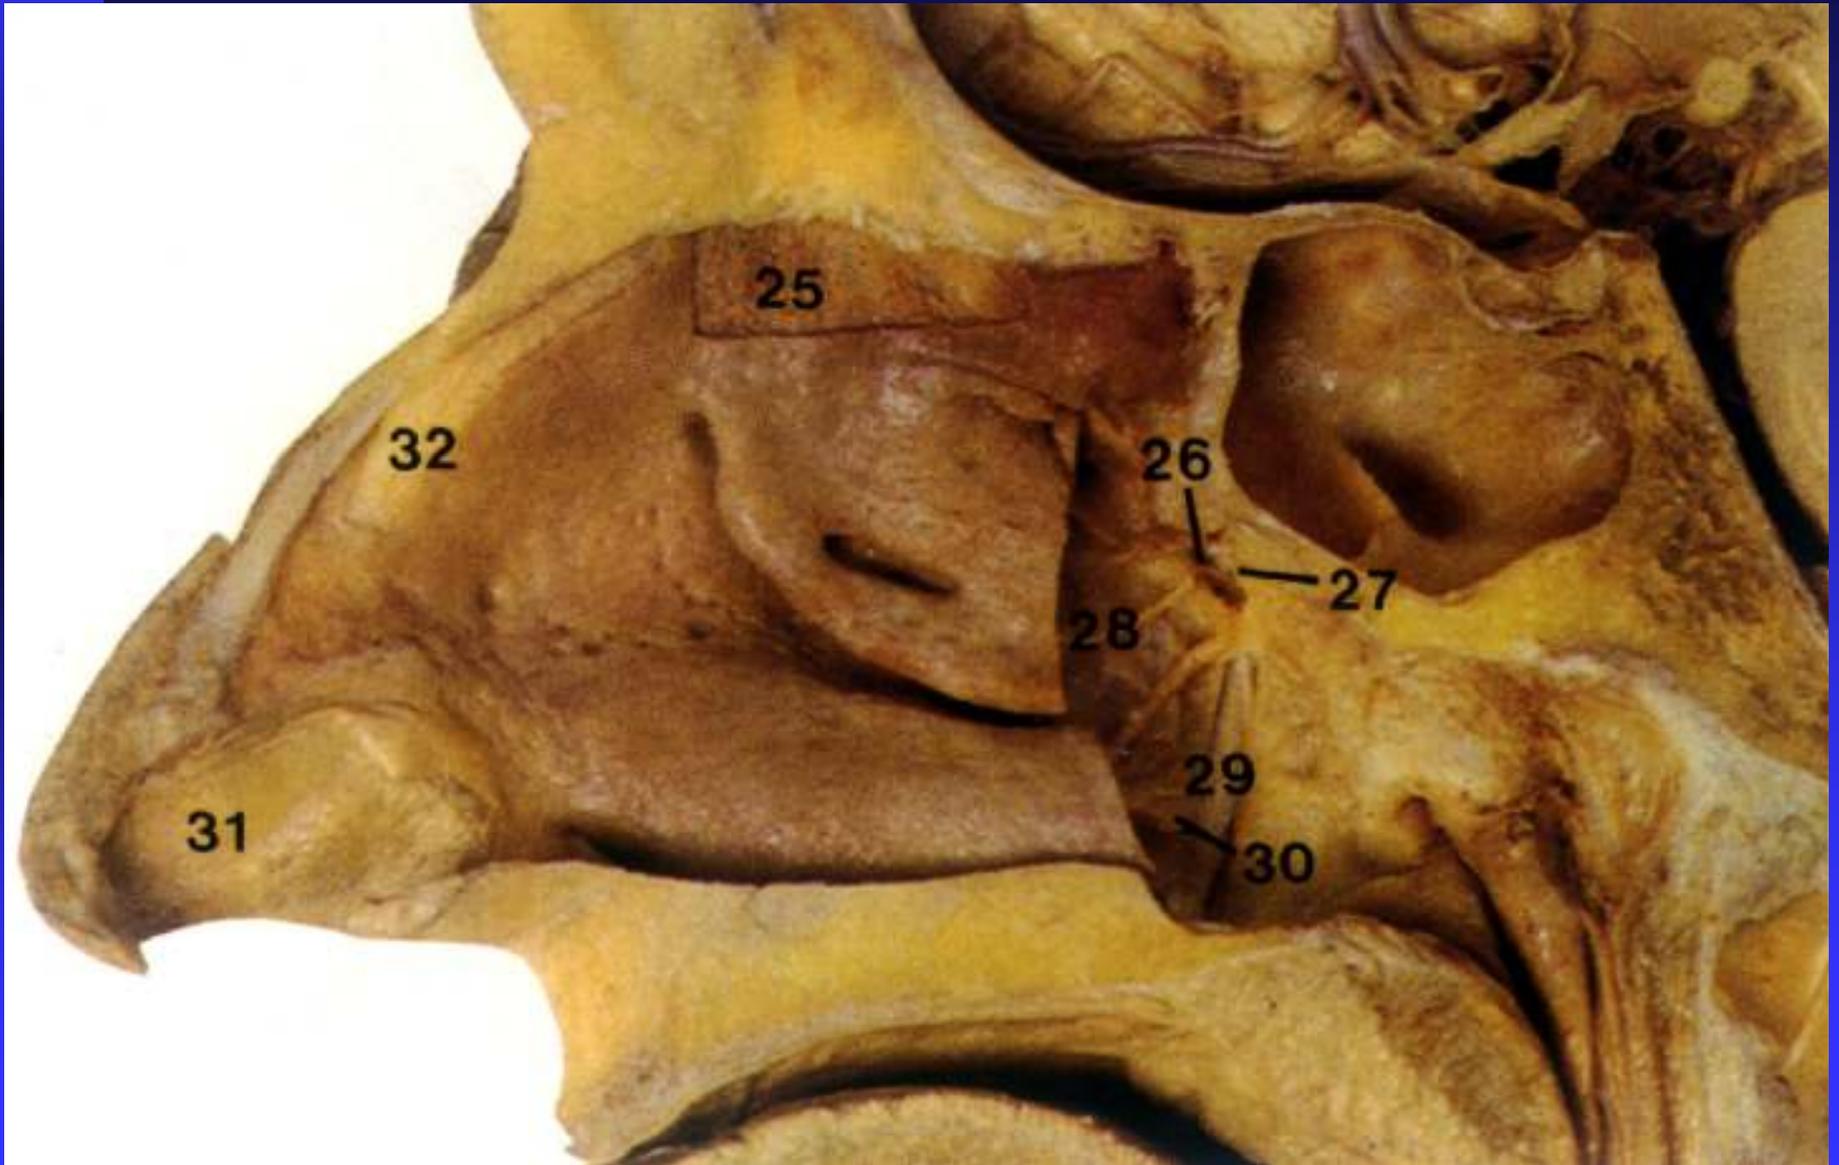

Corte ao nível da rima palpebral

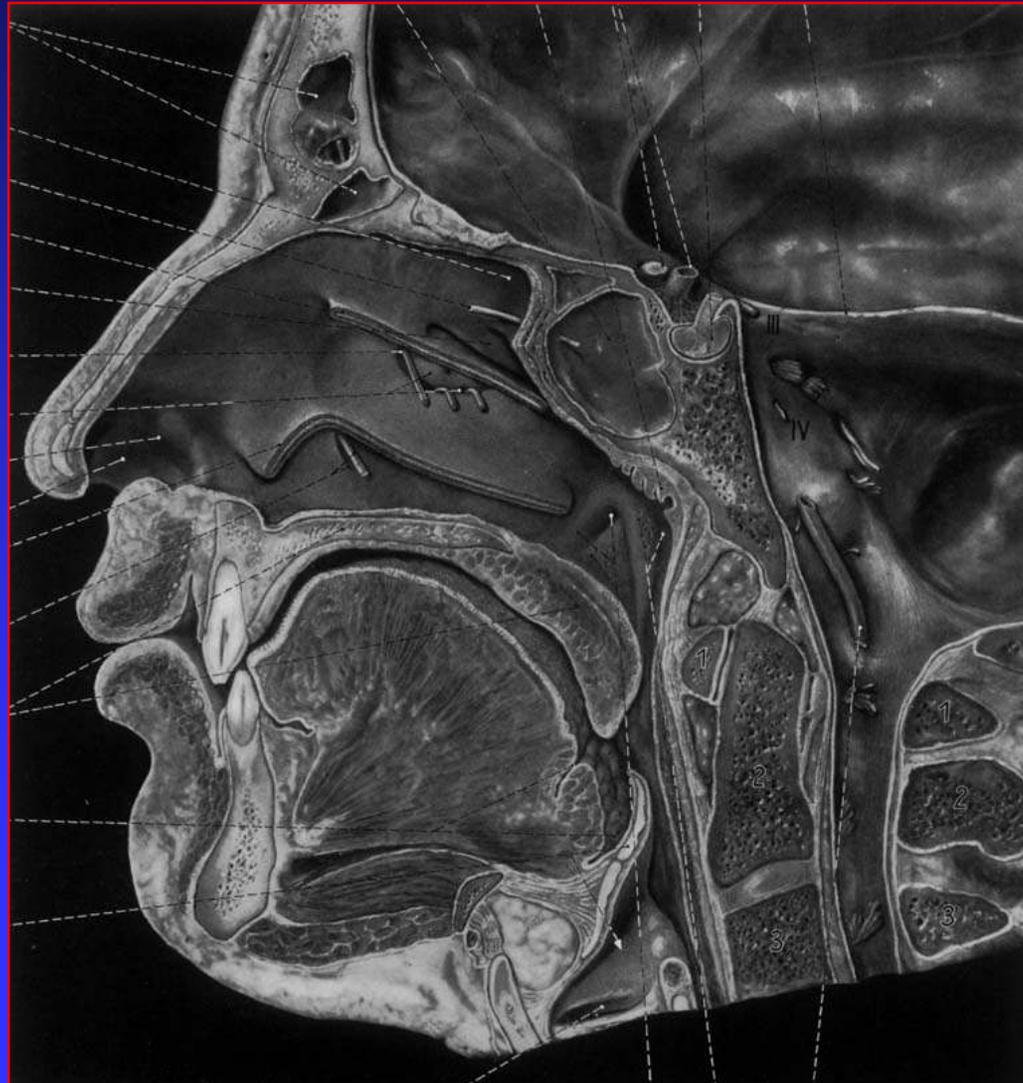

Secção coronal através do bulbo ocular

Nervos na parede lateral da cavidade nasal

CAVIDADE NASAL

SEIOS PARANASAIS

Grupo anterior

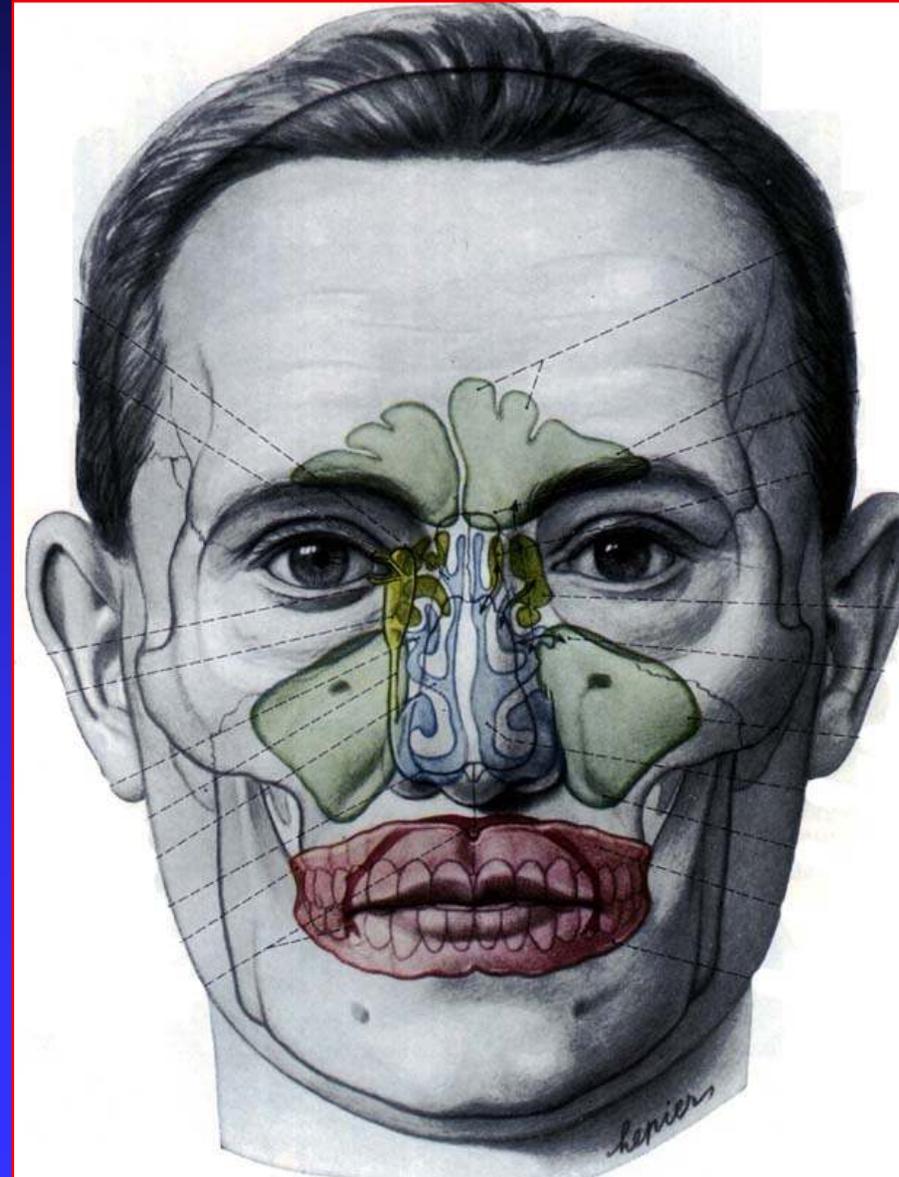

Maxilar, frontal, células etmoidais anteriores

Desembocam no meato médio

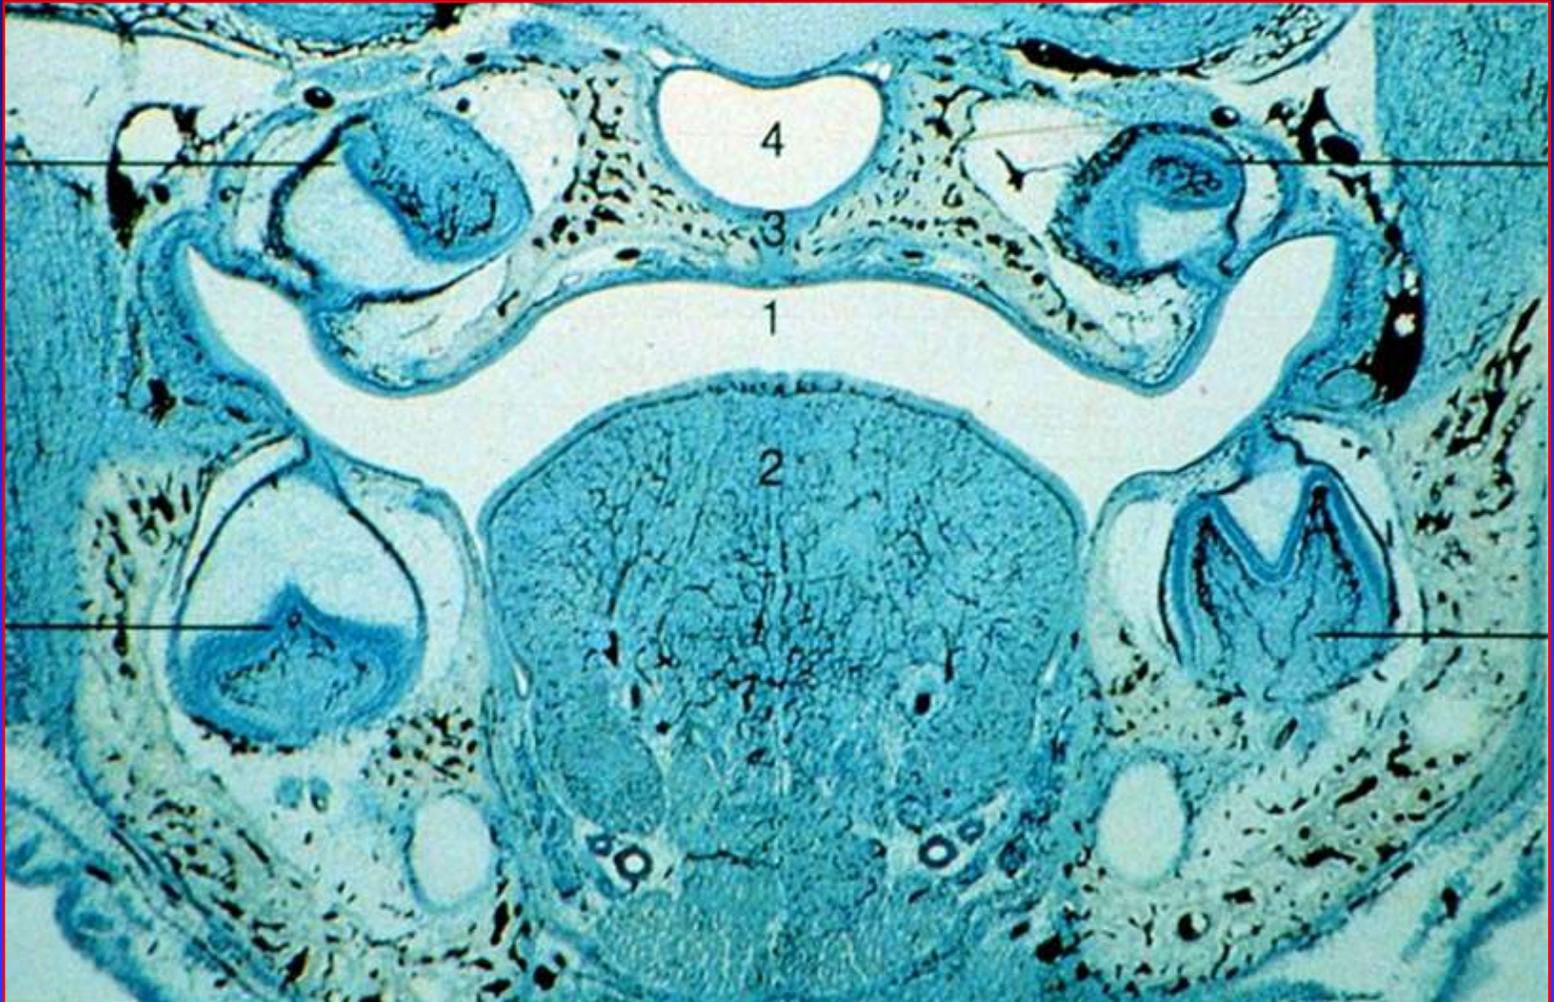

Grupo posterior

Esfenoidal, palatino, células etmoidais posteriores

Desembocam no meato superior

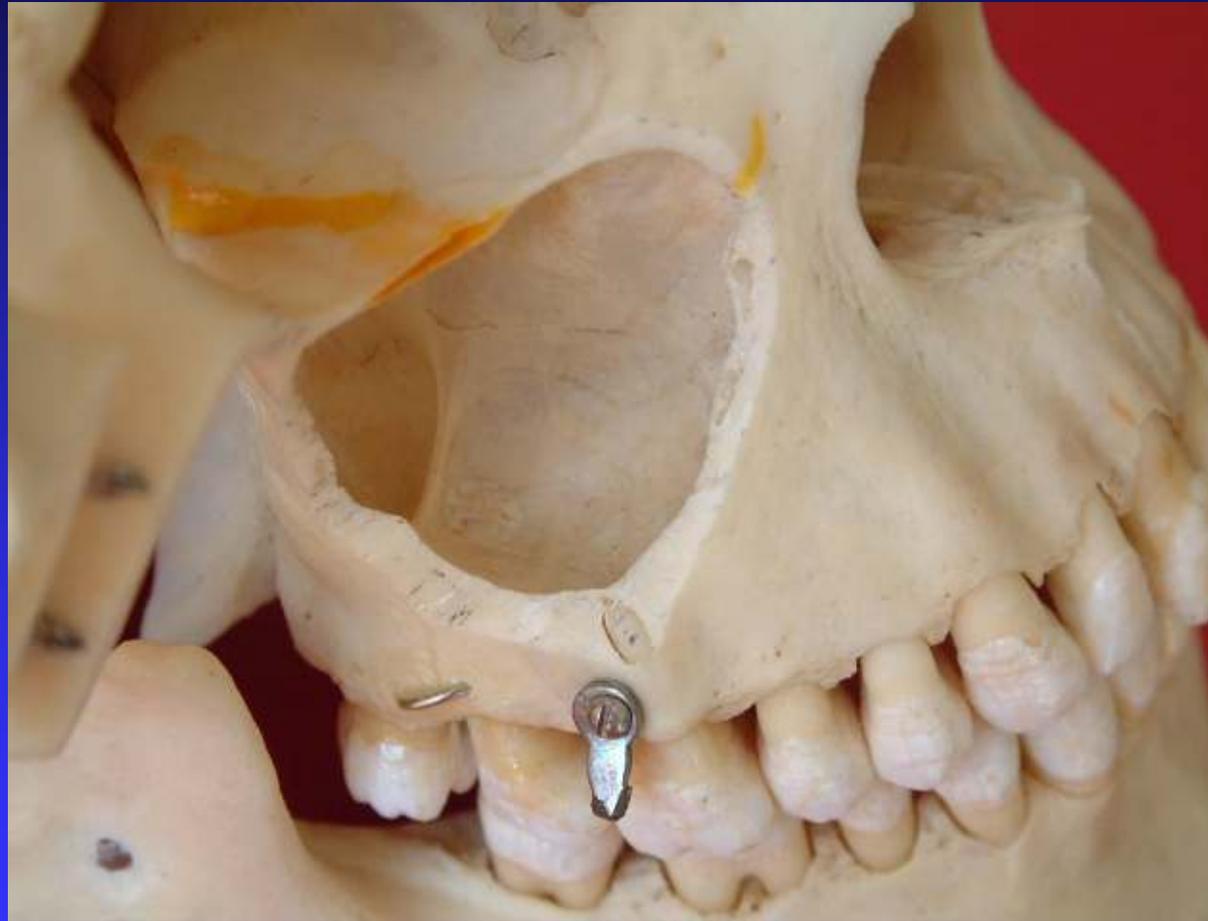

SEIOS PARANASAIS

SEIO MAXILAR

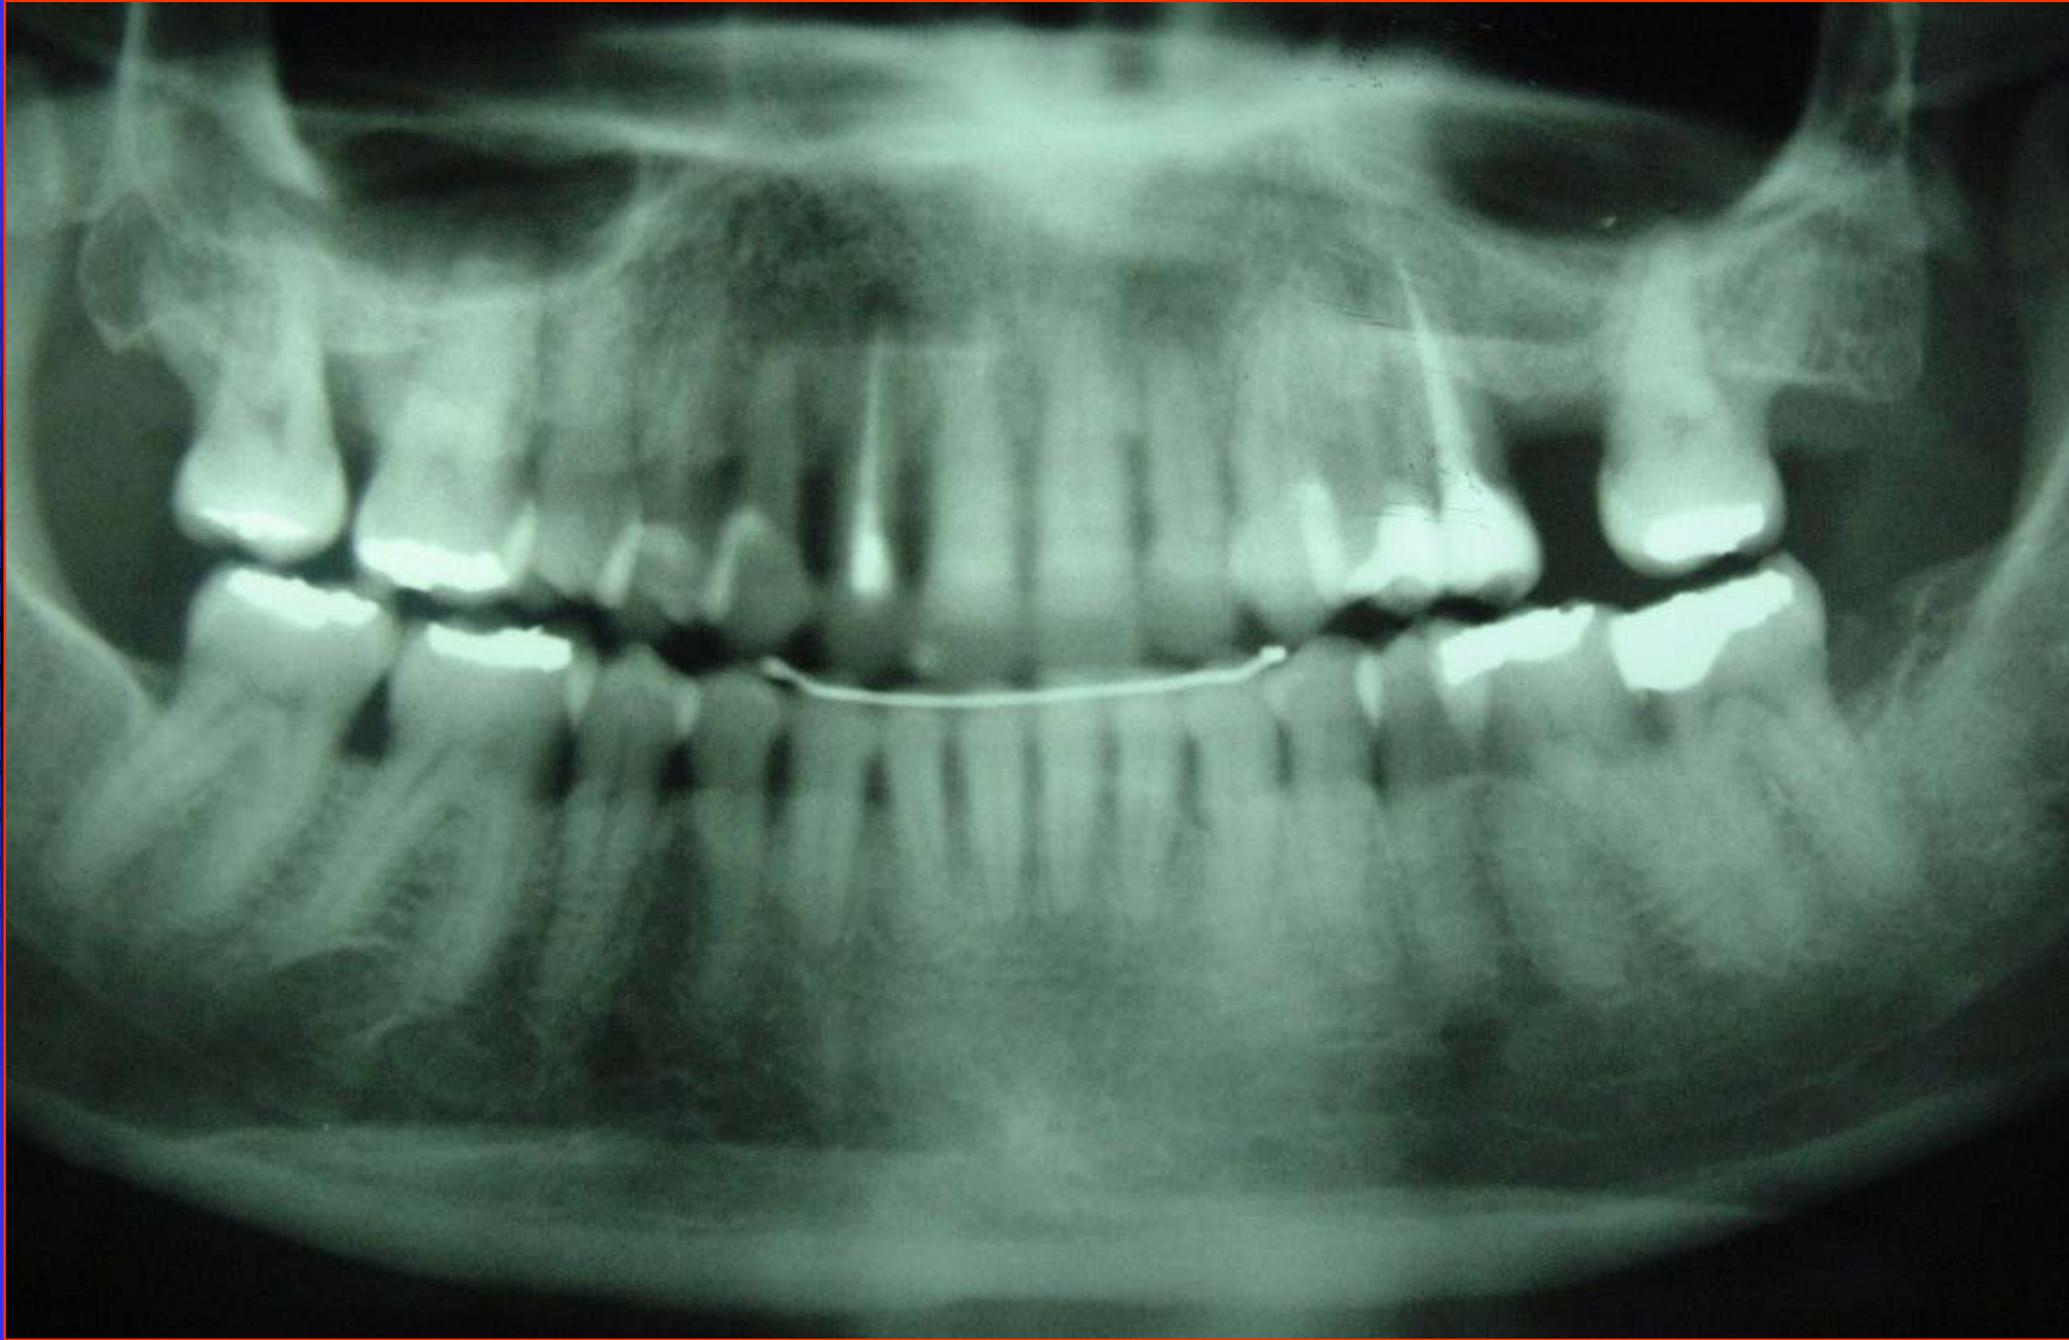

SEIO MAXILAR

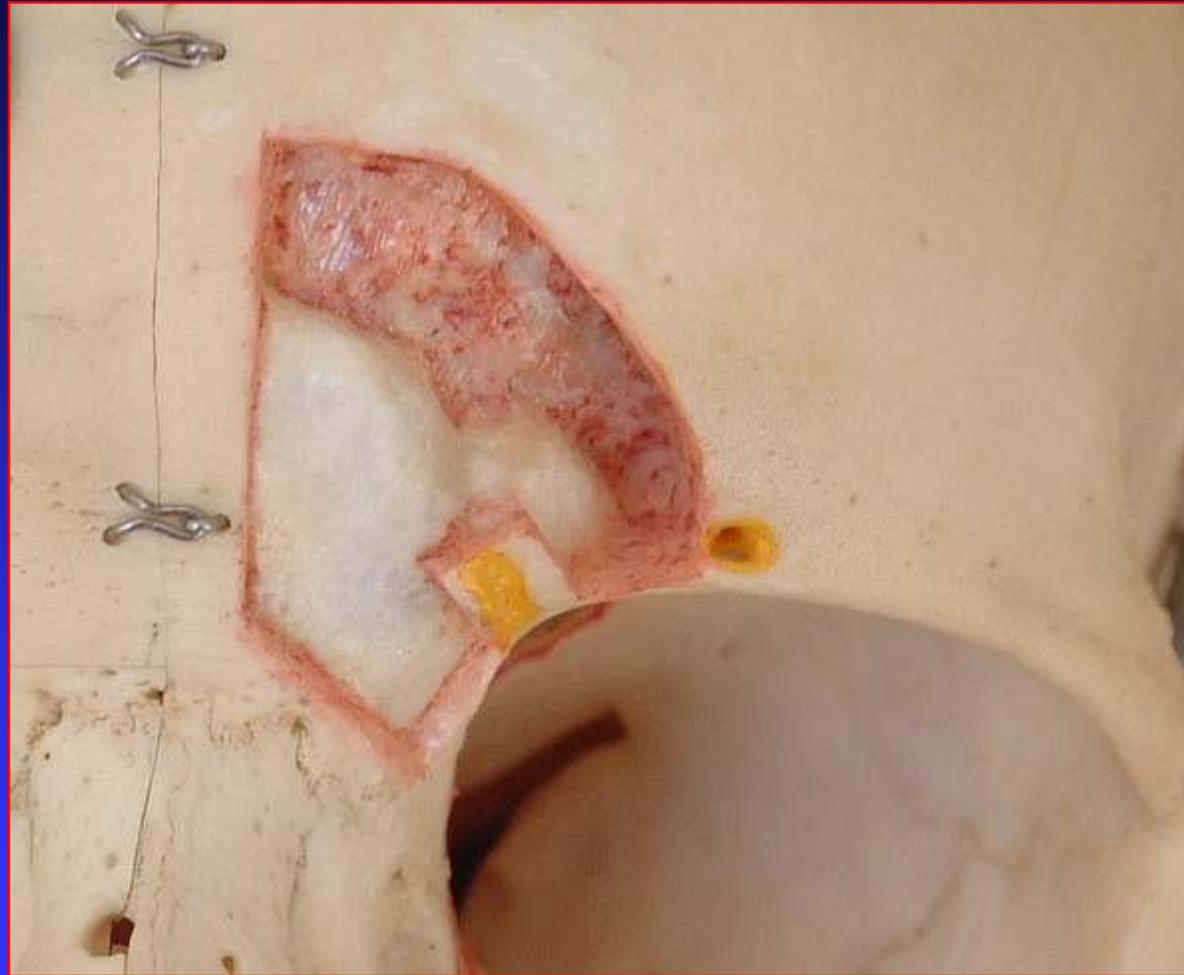

SEIO MAXILAR

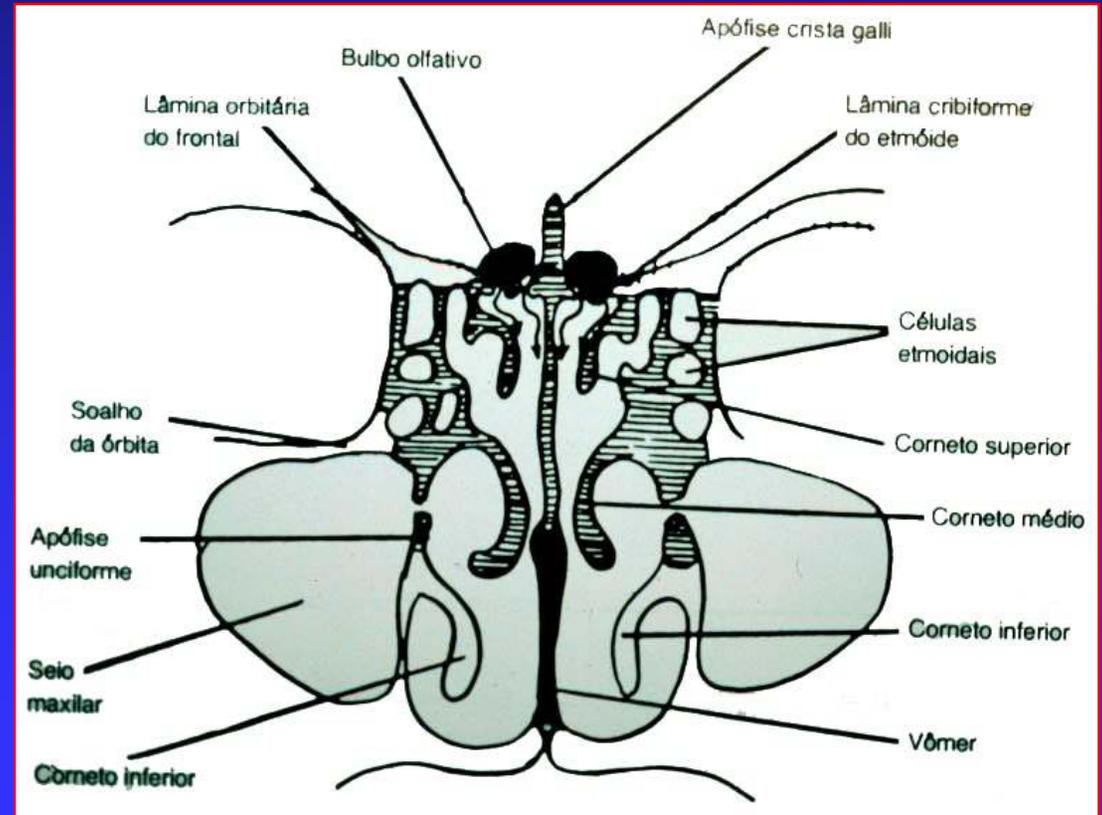

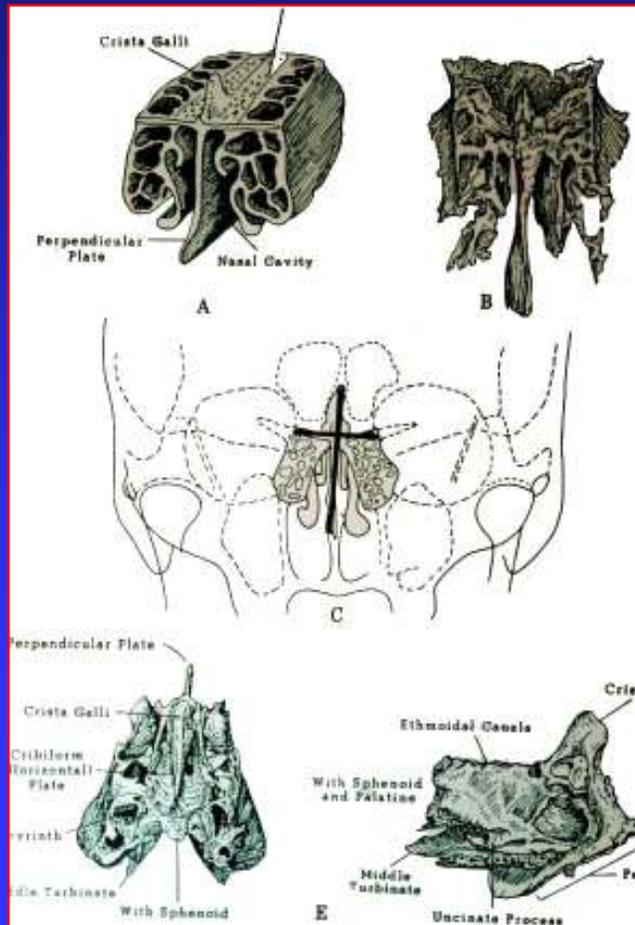

SEIO FRONTAL

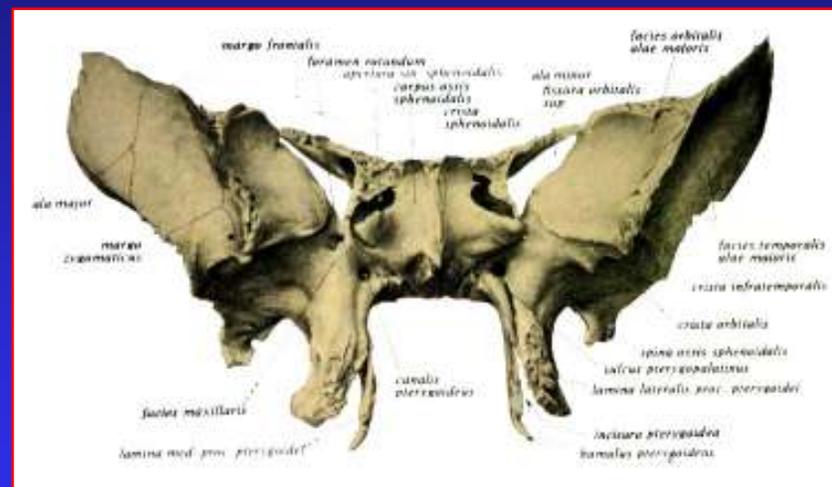

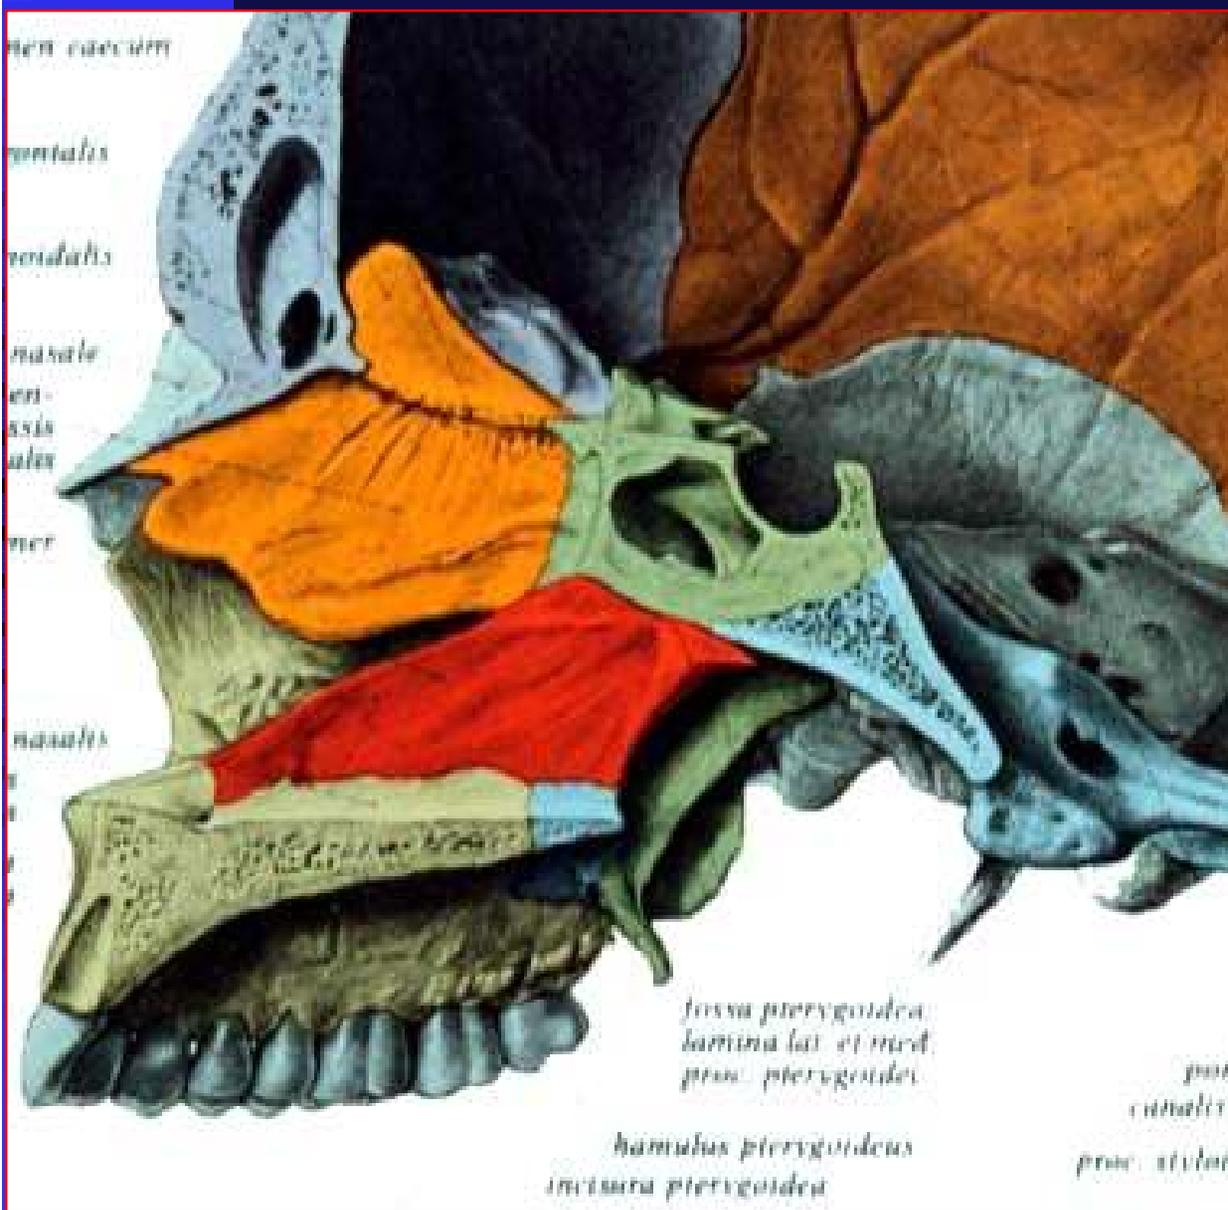

CÉLULAS ETMOIDAIS

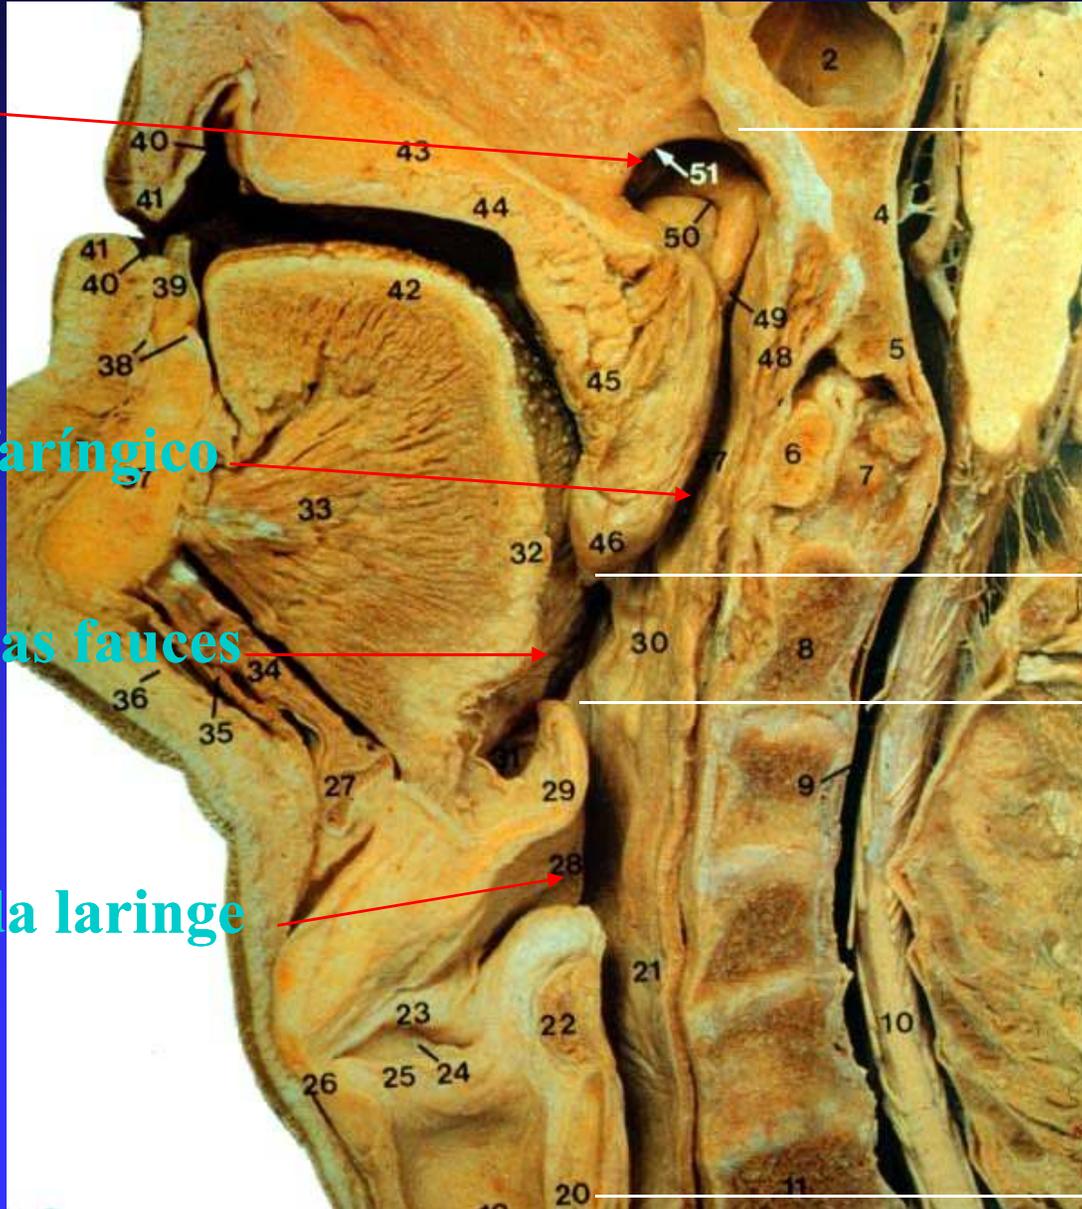

CÉLULAS ETMOIDAIIS

SEIO ESFENOIDAL

FARINGE

Fauces

Medial Sagittal View

Parte nasal

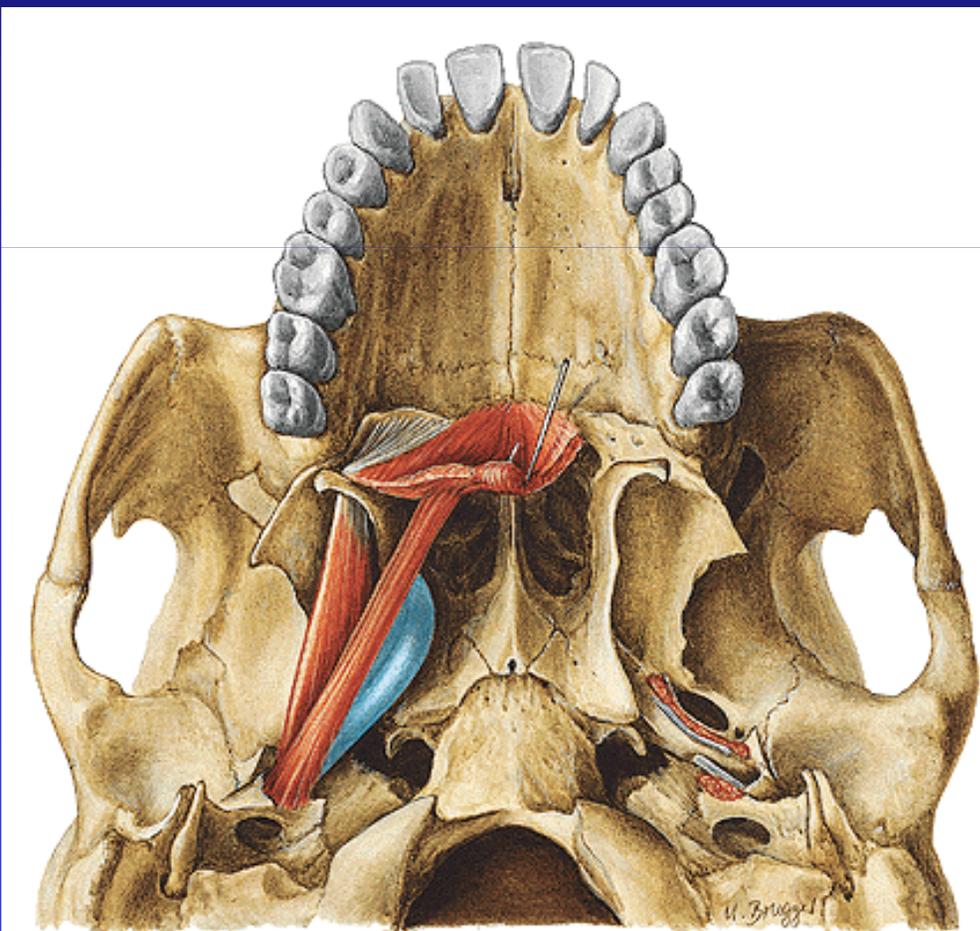

- 38= prega salpingopalatina
- 14= prega salpingofaríngea
- 37= toro do levantador
- 16= ósteo faríngeo da tuba auditiva
- 15= toro tubário
- 13= recesso faríngeo

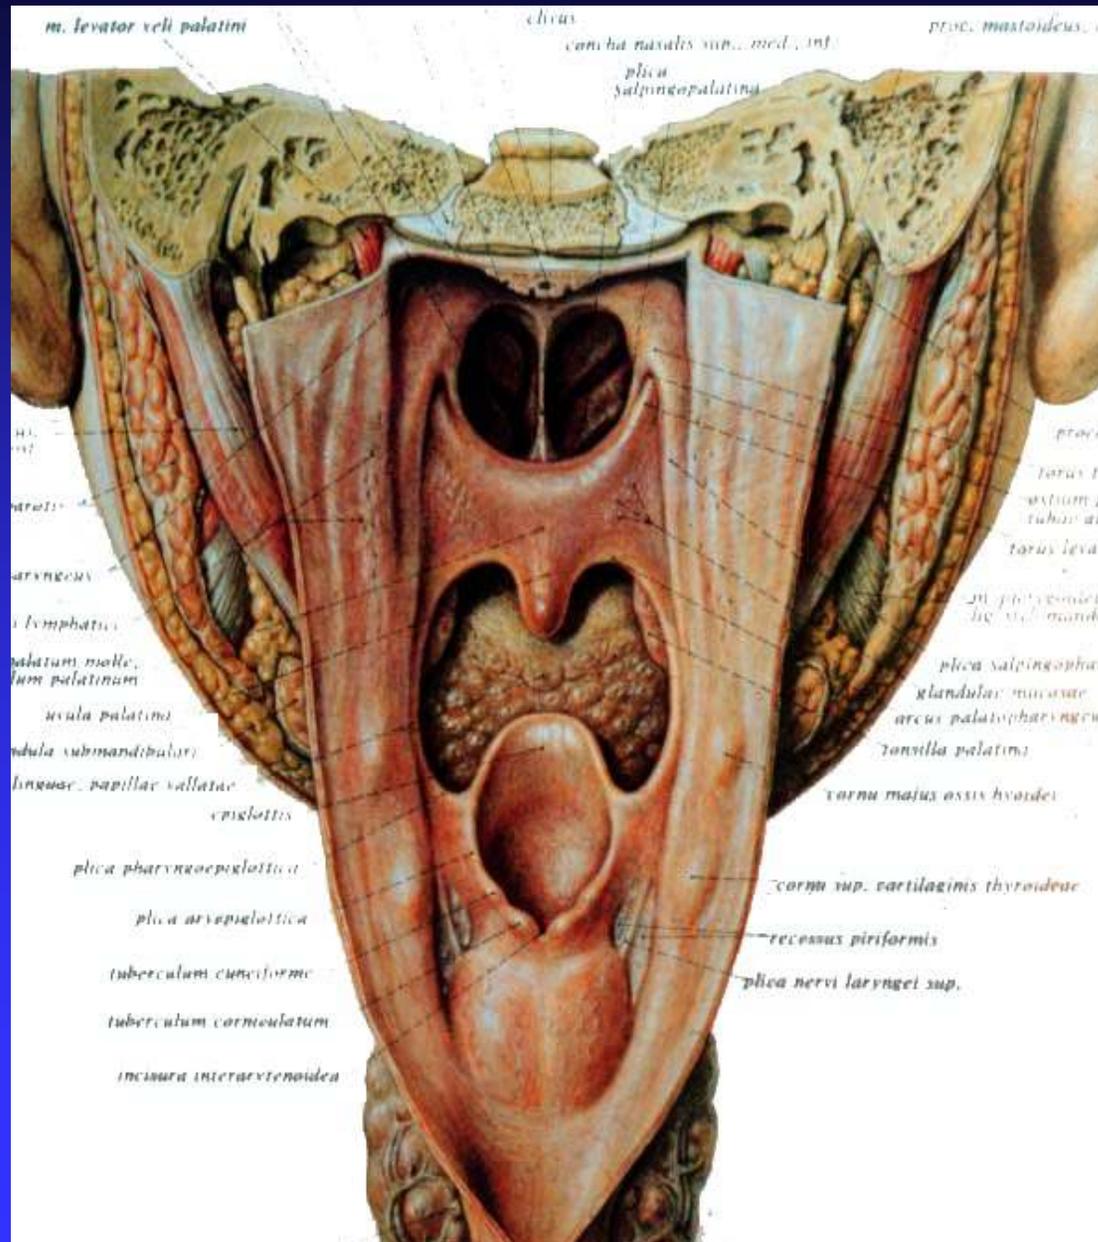

Tuba Auditiva

Conecta a nasofaringe à cavidade timpânica.

Equilibra a pressão do ar externo e do ar da cavidade timpânica.
